GLOSSARY OF COMMONLY USED TERMS

Baseline: Baseline is an analysis describing the initial state of an indicator before the start of a project/programme, against which progress can be assessed or comparisons made

Demographic Dividend: The demographic dividend is the accelerated economic growth that may result from a decline in a country's mortality and fertility and the subsequent change in the age structure of the population.

Flagship/Transformative Projects: These are projects with high impact in terms of employment creation, increasing county competitiveness, revenue generation etc. They may be derived from the Kenya Vision 2030 (and its MTPs) orthe County Transformative Agenda.

Green Economy: The green economy is defined as an economy that aims at reducing environmental risks and ecological scarcities, and that aims for sustainable development without degrading the environment.

Indicator:An indicator is a sign of progress /change that result from your project. It measures a change in a situation or condition and confirms progress towards achievement of a specific result. It is used to measure a project impact, outcomes, outputs and inputs that are monitored during project implementation to assess progress

Outcome Indicator:This is a specific, observable, and measurable characteristic or change that will represent achievement of the outcome. Outcome indicators include quantitative and qualitative measures. Examples: Enrolment rates, transition rates, mortality rates etc.

Outcome:Measures the intermediate results generated relative to the objective of the intervention. It describes the actual change in conditions/situation as a result of an intervention output(s) such as changed practices as a result of a programme or project.

Output:Immediate result from conducting an activity i.e. goods and services produced

Performance indicator:Ameasurement that evaluates the success of an organization or of a particular activity (such as projects, programs, products and other initiatives) in which it engages.

Programme: A grouping of similar projects and/or services performed by a Ministry or Department to achieve a specific objective; The Programmes must be mapped to strategic objectives.

Project: A project is a set of coordinated activities implemented to meet specific objectives within defined time, cost and performance parameters. Projects aimed at achieving a common goal form a programme.

Sectors: For the purposes of planning, the CIDP sectors shall be based on the following 10 County Sectors as per the departments – Public Service and Administration; Finance IT and Economic Planning; Education, Youth, Sports, Culture and Social Development; Health; Trade, Tourism, Investment, Agribusiness and Cooperatives; Environment and Climate Change; Lands Housing and Urban Development; Roads, Transport, Energy and Public Works; Agriculture, Livestock and Fisheries; Water and Irrigation.

Target: A target refers to planned level of an indicator achievement

The Blue Economy: Blue Economy means the use of the sea and its resources for sustainable economic development. The Blue Economy covers both aquatic and marine spaces including oceans, seas, coasts, lakes, rivers, and underground water. It encompasses a range of productive sectors, including fisheries, aquaculture, tourism, transport, shipbuilding and repair, energy, bio prospecting, bunkering, sport fishing, port services, marine insurance, freight forwarding and underwater mining and related activities.

FOREWORD

The Constitution of Kenya 2010 provides for two distinct and interdependent levels of government – the national and the county governments. The Constitution article 220(2) makes it mandatory for every County to prepare Development Plans. The County Governments Act, 2012 states that each county shall prepare a County Integrated Development Plan (CIDP) which shall be the basis for all budgeting and spending of public funds. In addition, every county government is expected to plan for the county and no public funds shall be appropriated outside a planning framework developed by the county executive committee and approved by the county assembly. The county integrated plan focuses on economic, physical, social, environmental and spatial planning.

According to the Public Finance Management Act, 2012 the budget process for county governments in any financial year shall begin with an integrated development planning process which shall include both long term and medium term planning which will in turn inform the county budget estimates and establish financial and economic priorities for the county over the short, medium and long term. The purpose of the CIDPs is to provide comprehensive guidelines in budgeting, project funding, monitoring and evaluation of all the projects for the next five years.

The Second CIDP for Murang'a County is a historical milestone. Apart from providing comprehensive guidelines in project identification, implementation and evaluation, it also facilitates proper coordination with the national government and other stakeholders in order to improve the well-being of the county citizens. In addition, the integrated development planning framework formulated will enhance linkage between policy, planning and budgeting.

The projects and programmes in this CIDP were identified through various consultative forums at the county level as provided for in the County Governments Act 2012. This was done through public participation forums which included electronic media sessions through local radio programmes, MTP II consultations as well as those on the county Medium Term Expenditure Framework. At the beginning of every financial year, annual work plans will be drawn to outline projects to be undertaken during that year.

It is my expectation that increased participation by a wide cross section of the people during identification, planning, implementation and monitoring and evaluation of projects and programmes will empower the people of Murang'a to realize their social, political and economic development. Mwangi Wa Iria Governor, Murang'a County

ACKNOWLEDGEMENT

The realization of the Second Murang'a CIDPhas been made possible through the involvement and support of many individuals and organizations. We would like to appreciate the role played by these individuals and institutions. I would like to greatly appreciate our governor, H.E. Mwangi Wa Iria for his financial and moral support for the process.

We are also grateful to the members of the County Executive Committee, Heads and staff of various county and national governments departments, community groups and the private sector for providing information and ideas on programmes and projects in various sectors. We also appreciate the AHADI consultants and the department of Economic Planning for spearheading the whole exercise of CIDP preparation right from data collection, collation, compilation, and coordination.

Finally, we would also like to thank the Speaker of the County Assembly, the Clerk and entire Members of the County Assembly for actively participating in forums which enriched the document significantly. Without their support this document could not have been made a reality.

God bless you all.

David W. Waweru, CEC, Finance,IT and Economic Planning

EXECUTIVE SUMMARY

Murang'a County is one of the counties created under the Kenya Constitution 2010. It is one of the five counties in Central region of the Republic of Kenya and occupies a total area of 2,558.8Km². It is bordered to the North by Nyeri, to the South by Kiambu, to the West by Nyandarua and to the East by Kirinyaga, Embu and Machakos counties. It lies between latitudes 0° 34' South and 1°7' South and Longitudes 36° East and 37° 27' East. The county lies between 914m above sea level (ASL) in the East and 3,353m above sea level (ASL) along the slopes of the Aberdare Mountains in the West.

The 2009 Population and Housing Census recorded a population of 936,228 persons for Murang'a County consisting of 451,751 males and 484,477 females and a growth rate of 0.4 per cent per annum. This population is projected to rise to 1,128,177 in 2018; 1,173,602 in 2020 and 1,214,071, persons in 2022. During the plan period, the county is targeting to improve access to markets and social amenities through improvements of 1750 Km of roads. Further, the sector targets to build 8750 Km of road to improve on the network and reduce distance to an all season road to within 2Km from the residential. The county has an old railway line of 65 Km which has one terminus at Maragua. The railway is however unutilized.

The major cash crops in the County include tea, coffee, avocado, mangoes, macadamia and horticulture crops, among others. Horticultural crops include tomatoes, cabbages, kales, spinach and French beans while food crops include maize, beans, bananas, sweet potatoes and cassava. In the education sector, the county has 1000 pre-schools, 512 primary schools, 306 secondary schools, 65 youth polytechnics, 1 technical institute two colleges (Murang'a Teachers Training College and Kenya Medical Training College) and one University (Murang'a University). The County has 272 health facilities serving a population of 1,128,177. It has 1 level five hospital, three mission/private hospitals and three nursing homes. There are 26 health centres (public and private), 114 dispensaries (89 public and 25 mission/NGO) and 137 private clinics.

The process of identifying the projects and programmes to be undertaken over the next five years involved the entire county and its citizens in order to find the best solutions to achieve participative, equitable and sustainable long-term development. It aims to coordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in the County. Through this process the efforts at national and devolved levels of government and other relevant public institutions are coordinated at local level with due consideration to the economic, social, environmental, legal and spatial aspects of development for the benefit of local communities. In addition, the plan aims to protect the right to self-fulfillment within the county communities and with responsibility to future generations.

In developing the CIDP, references were made to the provisions of the County Government Act, 2012; Transition to Devolved Government Act (2012); Urban Areas and Cities Act, 2011; and the Public Finance Management Act (PFMA), 2012. The first chapter gives a general overview of the county background. Chapter Two indicates the linkages between the CIDP and other National and international policy documents as well as integration of the SDGs. Chapter 3 gives a summary of the review of the implementation of the previous CIDP (2013-2017). Chapter four tabulates the strategic programmes and sub-programmes by sector while chapter 5 shows resource mobilization strategies, sources and allocations by sector. Also, chapter 5 outlines the governance structure of the county Chapter 6 outlines how programmes and projects will be monitored and evaluated in compliance with Section 108(1) (c) of the County Government Act.

CHAPTER ONE: COUNTY GENERAL INFORMATION

This chapter provides a sneak preview of county's location and size; physiographic and natural conditions; physical and topographic features; ecological conditions. It also documents demographic features as well as political and administrative units. The chapter further provides a detailed analysis of both macro and micro development indicators in various sectors of the county's economy.

1. COUNTY OVERVIEW

Murang'a County is the origin of Gikuyu and Mumbi, the forefathers of the Kikuyu. It is a cosmopolitan county located in the defunct central province. The headquarters of the county are in Murang'a town, formerly Fort Hall. The upper part of the county is mainly dependent on agriculture due to the fertile soils while the lower part depends on various informal businesses such as boda boda riding, quarry mining, and bee keeping. Other economic activities in the county include small-scale fishing, banking, hotel and tourism (mainly in Mukurwe Wa Nyagathanga), nut processing, and other small scale businesses spread across the various towns within the county. The county augments its fresh farm products from markets in neighbouring counties, such as Kagio Market in Kirinyaga County. There is also active interchange of goods and services in relation to labor, education, business, tourism, as well as infrastructure among other sectors.

1.1. Position and Size

Murang'a County is in the Central region of the Republic of Kenya. It borders Nyeri to the North, Kiambu to the South, Nyandarua to the West and Kirinyaga, Embu and Machakos counties to the East. It lies between latitudes 0° 34'; 1°7'South and Longitudes 36°; 37° 27' East. The county occupies a total area of 2,558.8Km^{2.}

Figure 1: Location of the County in Kenya

1.2. Physiographic and Natural Conditions

1.2.1. Physical and Topographic features

The County lies between 3,353m above sea level, in the West along the slopes of Aberdare Mountains and 914m ASL in the East. The western highlands have deep dissected topographyand drain into various rivers. These rivers flow from Aberdare ranges to the West, South Eastward and drain into Tana River. The County's geology and basement system comprises of volcanic rocks of the Pleistocene age and Achaean rock type respectively. The western part of the County bordering Aberdares is characterised by volcanic rocks while Eastern part is composed of the rocks of the basement system. Porous beds and disconformities within the volcanic rock system form important aquifers, collecting and moving ground water, thus regulating water supply from wells and boreholes. The County's rugged, dissected topography and geology is both an asset and liability to the County's development. The highest parts bordering Aberdares form the rain catchment areas, from where most of the rivers passing through the county originate. The volcanic rocks hence fertile soils result in thriving agricultural activities. The ecological conditions in the high areas provide a suitable environment for tea and coffee farming. However, this dissected topography causes gulley erosion and landslides hence construction and maintenance of bridges and roads are very expensive.

1.2.2. Ecological conditions

The county is composed of six agro-ecological zones. Zone 1 consists of the highest potential areas where forestry, tea and tourism industry are the major economic activities. Zones 2 and 3 are the lowlands east of Aberdares, which are generally suitable for both coffee and dairy farming. The flat area of Makuyu division in Maragua constituency is characterized by arid and semi-arid conditions. This forms the agro-ecological zones 4, 5, and 6. In these zones, coffee and pineapple plantations thrive under irrigation.

1.2.3. Climatic conditions

The County has three climatic regions: The western region with an equatorial type of climate, the central region with a sub-tropical climate and the eastern part with semiarid conditions. Long rains fall in the months of March, April and May. April reliably records the highest amount of rainfall. The short rains are in the months of October and November. The Western region covering Kangema, Gatanga, and higher parts of Kigumo and Kandara, is generally wet and humid due to its proximity to the Aberdare Ranges and Mt. Kenya. The Eastern region, covering the lower parts of Kigumo, Kandara, Kiharu and Maragua constituencies receive less rain and crop production requires consistent irrigation

1.3. Administrative and Political Units

1.3.1. Administrative Subdivision (sub-counties, wards, villages)

The county is divided into seven constituencies; Kiharu, Kangema, Mathioya, Gatanga, Kigumo, Kandara, and Maragua. The table below illustrates the administrative units, the land area, number of sub-counties, number of divisions, and number of locations in each sub-county.

Constituency	Land Area(Km²)	No. of Sub- Counties	No of Divisions	No. of Locations	No. of sub- locations	No of villages *
Kiharu	409.8	2	7	24	53	831
Kangema	173.6	1	3	11	33	198
Gatanga	599.0	1	7	21	59	1805
Mathioya	351.3	1	4	12	25	593
Kigumo	242.1	1	3	12	28	1067
Kandara	235.9	1	3	9	28	262
Maragua	547.2	1	3	11	34	328
Total	2,558.9	8	30	100	260	5084

1.5. Demographic Features

1.5.1. Population size and composition

Population is projected to rise to 1,128,177 in 2018; 1,170,109 in 2020 and 1,214,050 persons in 2022. This is based on the 2009 Population and Housing Census, which recorded a population of 936,228 persons for Murang'a County consisting of 451,751 males and 484,477 females, and with a growth rate of 0.4 percent per annum. It should however, be noted that these figures do not include the population by age cohorts for four locations (Kakuzi, Ithanga, Mitumbiri and Ngelelya) which are administratively in Kiambu County as per census report of 2009.

The male: female sex ratio for the county is 48:52. The higher female population in relation to male is attributed to high male emigration to other counties and towns in search of employment and business opportunities.

Age		2009			2018			2020		2022

(Under-5:Pre-school going age, 6-13: Primary school going age, 14-17: Secondary school going age, 15-35: Youth Population, 15-49: Female reproductive age, 15-64: Labour force, 65+: the Aged population)

1.5.4. Demographic Dividend

The demographic dividend is defined by United Nations populations Fund (UNFPA) as "the economic growth potential that can result from shift in a population's age structure, mainly when the share of the working age population (15-64) is larger than the non-working age share of the population (14 and younger, and 65 and older). Table 8 below shows the analysis of county demographic dividend potential.

Category	2009*	2017	2018	2020	2022
Population Size	942581	1,106,312	1,128,177	1,170,109	1,214,050
Population below 15 (%)	36.27	36.03	35.87	35.64	35.17
Population 15-64 (%)	56.2	57.66	57.86	58.16	58.54
Population above 65 (%)	6.85	6.31	6.27	6.20	6.28
Dependency ratio	76.73	73.44	72.83	71.94	70.81
Fertility rate (%)	3	3	3	3	3

Table 4: Demographic Dividend Potential

From the analysis, the county demographics show an increasing number of people in labor cohort (15-64) and declining fertility, which accords the county potential economic gain. However, the younger population must have access to quality education, adequate food nutrition and health in order for the envisaged "demographic gift" to occur. Moreover, the reduction in dependency ratio is a plus for the county since an increasing number of residents are independent.

1.6. Human Development Approach

During the planning period 2013-2017, the County Human Development Index was 0.624 while the National HDI was 0.561. This implied that the county was performing better in terms of human development. Currently, the HDI is 0.56 and 0.52 respectively for the county and national. This shows that the county is performing better though there is a significant decline compared to the 2013-2017 HDI index. This is partly attributed to growing unemployment especially amongst the youth, which currently stands at 22%.

1.7. Infrastructure Development

1.7.1. Roads, Rail Network, and Airstrips

The County has several road categories, with its mandate restricted to the unclassified category. The roads Authority plans to undertake GIS mapping of the

roads to counter the challenge of data inadequacy, which the sector faces. There are five bus parks in the County, namely: Murang'a in Murang'a town, Kiria-ini in Mathioya, Kangema in Kangema town, Kangari in Kigumo, and Kirwara in Gatanga.

The County has a piece of land earmarked for constructing an airstrip at Kambirwa in Kiharu constituency. The old railway (65Km) line traverses through the county with one terminus at Maragua. If revived the railway line would be useful for transporting fertilizer, coffee and tea. This railway line however, is underutilised.

1.7.2. Information, Communication Technology which include post offices, mobile telephony, landline, fibre optic cables, radio and television and Huduma centres

The County has high mobile network coverage of about 97% of the area with Safaricom, Equitel, Jamii Telkom, Airtel Kenya, and Telkom Kenya as the main service providers. There are six post offices, three sub-post offices, a Huduma Centre, and four courier services operating in the county.

The county is served by all national mainstream TV and Radio stations with more than 6 of the radio stations and 5 TV stations broadcasting in the local language. Two radio stations that have their studios in the county are Kangema FM (Ranet FM) in Kangema Town, and Radio Maria in Murang'a Town.

1.7.3. Energy access

The energy subsector promotes environmental friendly, sustainable and renewable sources of energy. There are 123,900 electric connections, out of which 23115 are new ones. About 1% of the households use solar energy. The Last Mile Connection Project envisages connecting more than 85% of the households. Other main sources of energy commonly used in the county are firewood, paraffin, charcoal, and LPG gas. Solar powered lights were installed along a 2km stretch in Kabati. Some other 55 poles were installed across the county in areas such as Makuyu, Mbombo and Kambiti for fruit vendors during the 2013-2017 plan period

1.7.4. Housing

In Murang'a County, more than 40% of the households live in stone/brick walled houses, less than 58% in mud/wood walled houses while about 2% live in grass straw/tin walled houses. Most housing units in the county are roofed with corrugated iron sheets (about 95%), while makuti and grass roof constitute 0.18% of the households. Majority of these housing units have earth floor (60%), followed by cement floor at 39%. Records from the county department of housing indicate that the county has there are 47 low grade, 13 middle grade county government owned houses and no high grade houses.

1.8. Land and Land Use

1.8.1. Land ownership categories/ classification

Land in Murang'a County is classified into freehold or leasehold land. Freehold land is held by an individual for an unspecified period of time while leasehold land is given by the government to and individual or organization over a specified period of time and is expected to remit rent to the government.

1.8.2. Mean holding size

The county has a total area of 2,558.9Km², of which 11.2Km² is water mass. The arable land is, 2,135 Km² while non-arable land is 163.3 Km². The gazetted forest covers an area of 254.4 Km² while approximately 20 Km² is urban area. The average farm size under large-scale holdings is 6.4 ha. Total acreage under food crop farming is 180,225 ha while that under cash crop farming is

42,980 ha. The land under soil conservation is 55,780 ha; farm forestry is 108,352 ha while area under organic farming is 11,156 ha.

The main land use activities in the county are cash crop farming, subsistence farming, livestock keeping, fish farming, housing and forestry.

1.8.3. Percentage of land with title deeds

Murang'a County is predominantly agricultural therefore, land holding is considered important. It is estimated that about 33,000 farmers have title deeds with a population of about 250,000 farmers.

1.8.4. Incidence of landlessness

Majority of the county population own land. Incidence of landlessness is approximately 0.2per cent. This is as a result of concerted efforts by the government to resettle the landless at Maranjau area in Kambiti Location of Maragua constituency.

1.8.5. Settlement patterns (Urban centres, informal settlement, etc.)

Human settlement patterns in Murang'a vary from town to town due to various reasons, which include socio-cultural basis, topographic characteristics, and economic output of the areas.

Linear Settlements are settlements along lines i.e. major roads and rivers.80% of service centres in Murang'a County are located along roads. Linear settlement are majorly located on suburban areas of the county

Scattered settlements are settlements where household are located at a distance from each other. This is mainly experienced in the semi-arid parts of the county.

Nuclear settlements are settlements that are characterized by a concentration of households in a specific area i.e. around towns.

1.8.6. Type and size of land

In Murangá County, land is classified as public, community, or private. According to the constitution, public land is Land which at the effective date was alienated government land as defined by an Act of Parliament in force at the effective date, land lawfully held, used or occupied by any State organ, land transferred to the State by way of sale, reversion or surrender, land in respect of which no individual or community ownership can be established by any legal process or land in respect of which no heir can be identified. Public land shall vest in and be held by a county government in trust for the people resident in the county, and shall be administered on their behalf by the National Land Commission.

Community land is land held by communities identified on the basis of ethnicity, culture or similar community of interest. It consists of: land lawfully registered in the name of group representatives under the provisions of any law, land lawfully transferred to a specific community by any process of law, any other land declared to be community land by an Act of Parliament; and land that is used by the community as community forests, grazing areas or shrines, ancestral lands or land lawfully held as trust land by the county governments.

Private land is registered land held by any person under any freehold tenure or any other land declared private land under an Act of Parliament.

1.9. Employment

1.9.1. Wage earners

Wage earners in the county are mainly employed on casual basis either temporarily or seasonally with no job guarantee or security. This group accounts for 18per cent (78,193 persons) of the total employment in the county.

1.9.2. Self-employed

The self-employed are categorized as rural self-employed who account for 34,752 people and urban self-employed who account for 73,849 persons in the county. The self-employment opportunities are expanding with the expansion of towns and market centres in the county due to rural urban migration.

1.9.3. Labour force by sector

The labour force accounts for 527,679 persons or 55.3 percent of the total population of the county and is expected to increase to 538,339 persons by 2017. Those in employment account for 434,405 persons. The biggest challenge for this group is to create adequate and gainful employment opportunities. Processing of agricultural produce which accounts for a mere 3.6per cent of those in employment has great potential to form the core labour niche in the county.

1.9.4. Unemployment levels

The rate of unemployment in the county is approximately 17.67 percent or 93,241 persons. The county should therefore strive to reduce the unemployment rate by adopting policies and programmes that are labour intensive.

1.10. Irrigation infrastructure and schemes

1.10.1. Irrigation potential

Murang'a County has a total of about 230,000 ha irrigation potential out of which only 23,000Ha has been exploited. Therefore there is a huge irrigation potential which is yet to be exploited. The ideal location as a water catchment within the Aberdare Ranges water tower gives it a competitive advantage over its neighbours both in terms of markets access, infrastructure and production potential.

The Irrigation Sub-sector intends to exploit about 9,000 Ha of this potential in its short, medium and long term specific objectives. This plan will assist the County Government to map out the strategies and resources required to empower the smallholder irrigation farmers engage in both sustainable crop production and poverty alleviation initiatives through income generation.

1.10.2. Irrigation schemes (small/ large scale)

Murang'a County has two main categories of irrigation schemes namely smallholder community irrigation schemes and individual/private schemes. Smallholder community irrigation schemes areinitiated, owned, operated and managed by the scheme members. The majority of the schemes in Murang'a County fall under this category. Water for these schemes is usually abstracted from the rivers and conveyed to the farms by gravity through closed conduits for ultimate use. The most common water application method is the sprinkler system. These schemes further fall into complete and operational irrigation schemes, designed irrigation projects, proposed irrigation projects. Complete and operational schemes and designed irrigation projects have 12 schemes each.

Individual/private schemes are managed by companies or individual farmers. These private schemes are normally large scale farms that grow high value crops like cut-flowers, French beans, pineapples, coffee, etc. These schemes include: Delmonte Ltd, Kakuzi Ltd, Enkarsiti Farm, Simbi Roses, Aberdare/Thuita Farm, Bendor Farm in Gatanga Sub-county and Everest Farm Maragua Sub- County. The total irrigated area by the private/individual schemes is about 200 ha. Most of these schemes use pump-fed sprinkler and/or drip system.

To achieve the vision of being the model County in small holder irrigation in Kenya, the strategy recommends that immediate investments be committed in the short term towards completion of fifteen ongoing and the three fully designed projects that will enable it increase agricultural production from the current 60% to 90%. A detailed survey and design will also require to be undertaken for the twenty eight

proposed irrigation projects.

A feasibility study and detailed survey is recommended to be conducted for three mega dams and expansion of irrigated land from the current 1,000Ha to 9,000Ha in the medium term. The full implementation will only be realized when the County embraces water harvesting and storage and construction of Mega dams in the long term period whereby 30,000 ha can be realized by the year 2030.

1.11. Crop, Livestock, Fish Production and Value addition

1.11.1. Main crops produced

The major cash crops in the County include tea, coffee, avocado, mangoes, macadamia and horticulture crops, among others. Horticultural crops include tomatoes, cabbages, kales, spinach and French beans while food crops include maize, beans, bananas, sweet potatoes and cassava.

1.11.2. Acreage under food and cash crops

The acreage under food crops and cash crops are 329,234 and 177,636 respectively. The acreage under food crop is almost twice that of cash crop. Food crop farming is practiced in all parts of the county but cash crop farming is practiced in upper zones and in some lower zones of the county.

1.11.3. Average farm sizes

The average farm size for most of the county's households is 1.4 acres. As a result of this, farmers are not able to produce large quantities of crops to warrant large storage facilities at household level. Nevertheless, the average large scale farm size is 16 acres which are commonly found in the lower parts of the county and in tea, coffee, pineapples, mango, and flower estates.

1.11.4. Main storage facilities

The storage facilities range from granaries to grain stores and milk coolers. Grain stores are found in NCPB outlets in Maragua town. Milk coolers are found in milk collection centres in Kigumo, Kangema, Kandara and Maragua. Granaries are found at household level due to small quantities of produce. Tea leaves and coffee berries are stored in their respective factories.

1.11.5. Agricultural extension, training, research and information services

There is 1 training institution (Kenyatta Agricultural Training Center-Mariira farm) in Kigumo Sub-County. However, there are efforts to start a mechanization institution (Thai Farm) in Kambirwa augmented by other continuous agricultural demonstrations in farmers' fields and schools.

1.11.6. Main livestock breeds and facilities

The main livestock bred in the county are cattle, pigs, goat, sheep, rabbits and chicken. Exotic cattle breeds are found in the upper parts of the county while indigenous cattle breeds are found in the lower parts of the county. Dairy and indigenous goats are spread all over the county but they thrive well in the lower parts. Pigs are of different varieties and reared all over the county due to readily available market offered by Farmers' Choice. Rabbits and chicken are reared in response to demand for white meat.

1.11.7. Ranching (number, ownerships and activities)

The County has one company ranch owned by Kakuzi Limited of approximately 213 Acres. This is a private company listed in the Nairobi Stock Exchange.

1.11.8. Apiculture (bee keeping)

Apiculture in the County is underutilized with concerted efforts to improve it. Currently, there are approximately 11,962 beehives.

1.12. Oil and Other Mineral Resources

1.12.1. Mineral and Oil potential

There are no known potential mineral deposits in Murang'a County. Researchers are however encouraged to continue exploration works in various parts of the county to ascertain if the county has any mineral potential.

1.12.2. Ongoing mining and extraction activities

Major quarrying activities in the County include extraction of stone, ballast, sand, and marram mainly for housing and road construction. However, there is scanty information on the same with efforts to create a database to capture the majorly informal mining activities.

1.13. Tourism and Wildlife

1.13.1. Main tourist attractions and activities

The main tourist attraction sites in the county are the *Aberdares* National Park and the cultural heritage sites that have a rich history on the origins of the *Agikuyu* people. Such sites are at *Mukurwe WA Nyagathanga* and *Karia Ka Mbari ya Ngware*. Moreover, there are ideal natural sites for hiking and camping at Rapids Camp, *Aberdare* cottages and sport and leisure fishing sites at *Kimakia* fishing grounds and *Ndakaini* Dam.

1.13.2. Classified / major hotels (numbers, bed capacity and distribution by

sub-**county)**

The County has a number of major hotels which include Nokras Riverine, Hotel Nokras, Fortune Green, Stanleys Haven, Murangá Mukawa, and Sagana Getaway in Kiharu Sub-County; Golden Palm Hotel in Kandara Sub-County; Trotters Hotel in Maragua Sub-County; Ranges View Lodge, Goshen Farm Hotel, and Green Coral in Mathioya Sub-County; Muchiris Resort Ndakaini in Gatanga Sub-County. Most of them are unclassified. However, tourism potential in the countyis untapped, there are no tourist class hotels or restaurants. This is because the available tourism packages are often irregular and the tourists usually visit the county during the day and then go to reside in hotels outside the county.

1.13.3. Main wildlife

The main wildlife in the county are elephants. Other wildlife in the county is Columbus monkeys and their related species. Elephants are the major source of human-wildlife conflicts especially in Mathioya and Kigumo constituencies. This is due to the constituencies' proximity to the Aberdare forest which forms the wildlife habitat. Vervet species of monkeys have also created conflicts with humans especially in Gatanga Sub County.

1.13.4. Wildlife conservation areas (game parks, reserves, conservancies, game ranches)

The main wildlife conservation area is the Aberdare forest which is the wildlife habitat.

1.13.5. Total number of tourists (both domestic and foreign) visiting attraction sites annually

There is no documented data on the number of tourists. However, there are efforts by the department of tourism to create a database.

1.14. Industry and Trade

1.14.1. Markets

There are 412 market centres with 10890 and 595 retail and wholesale traders respectively. As at 2016, there were 437 trading centres, 9980 licensed retail traders, and 6 supermarkets.

1.14.2. Industrial parks (including *Jua Kali* sheds)

The County has several private industrial parks for mango, avocados, and macadamia processing. There are efforts to establish a public industrial park at Mitubiri Wempa in Maragua Sub County.

1.14.3. Major industries

Murang'a County has several agro-processing factories as shown in the table below:

Sub- Counties	Industry/ factory by Type								
	Теа	Coffee	Milk	Fruits	Nuts	Animal Feeds	Cottages		
Kangema	1	15	2	0	0	0			
Mathioya	2	16							
Murang'a East	3	6			1				
Murang'a South	0	8		1	1	3	5		
Gatanga	2	21	0	2	1	0	1		
Kandara	1	34	1						
Kigumo	3	38							
Kahuro	1	23							
Total	13	161	3	3	3	3	6		

As per the above table, most of the industries are agro based industries with coffee being the leading followed by tea. Most of the factories produce semifinished products which are exported to other counties then internationally as raw materials and do not fetch optimum prices. Therefore, there is need for the factories to refine and package the end products so that there is optimum returns and creation of more employment opportunities in the county. Only a few factories like Del Monte and Farm Nut produce finished products and hence are some of the largest employers. The county has potential for more industries especially in mango, banana and milk processing. Potteryremains unexploited, where finished products of clay are exported. However, clay soil is currently exported to other counties.

1.14.4. Types and number of businesses

As at 2016, the County had a total 16,829 licensed businesses comprising of 9980 retail traders, 6 supermarkets (inclusive of branches), 1595 wholesale traders, 560 licensed hawkers, 450 registered hotels, 40 petrol station, 1240 licensed liquor outlets, 2933 informal enterprises and 25 kerosene pumps.

1.14.5. Micro, Small and Medium Enterprise (MSME)

Majority of the businesses in Murang'a county fall under the MSME Category and are spread across the county with a good percentage of them being sole proprietorships and family owned and run businesses. There were about 16,829 licensed MSMEs in the County as at 2016.

1.15. The Blue Economy (including Fisheries)

1.15.1. Aquaculture

Blue economy in the County is expected to spur economic growth by improving livelihoods and job creation in County. There are 2392 fish farming families and 2511 fish ponds. There is need to increase the construction of new fish ponds and preservation of the existing ones. Aquaculture is an emerging fisheries enterprise in Murangá County.

1.15.2. Main fishing activities, types of fish produced, landing sites

By June 2017, over 2,392 fish farmers owning over 2,511 fish ponds covering approximately 700,833 m^2 (70.8 ha) were operating within the seven sub counties. However, there is a great potential in aquaculture, given the county's vast water resources and high demand for some of the indigenous fish species in both the local and regional market. Aquaculture fish include; tilapia, African catfish, rainbow trout, ornamental fish. Capture fisheries reared from rivers and dams are tilapia, rainbow trout and common carp.

1.16. Forestry, Agro Forestry and Value addition

1.16.1. Main Forest types and size of forests (Gazetted and Un-gazetted forests)

The county has five indigenous gazetted forests covering a total area of 254.4 Km2. They are Gatare, Karua, Kimakia, Kiambicho and Wanjerere forests. These forests are divided into two zones; the tropical montane forest zone located along the Aberdare ranges and the semi-arid forest zone located in the lower parts of the county. Residents engaged in farm forestry are 282,744, there are 204,557 farm forests, which are privately owned plantations, and the average number of trees per farm is 105.

1.16.2. Main Forest products

The main forest product in the county include: timber (approximated at over 64 million running feet), firewood (over 500,000 stacks) and seedling production, both KFS (3,400,980) and private (87,458,280) bringing the total number of seedling production at 90,859,260. Other minor forest products include grass (1948 in bags), bamboo sticks (1638 pieces), medicinal herbs, honey and charcoal (335 bags). The forests are also the major sources of various rivers namely Maragua, Mathioya North, Mathioya South, Kiama and Thika rivers.

1.16.3. Agro-forestry

Agro forestry involves tree farming with crops and/or pasture that does not bring about competition for resources and nutrients between them. Green economy

involves the production of energy from renewable sources such as bio fuel, solar, wind and biogas. The county has 267,744 acres under farm forestry in 204,557 farms, a slight reduction due to increased farming of both cash crops and food crops. There are 282,774 people involved in farm forestry with an average of 105 trees per farm.

a) Income generating activities: Forestry related income-generating activities in the county range from tree nursery management activities to sale of forest products. The main types of forest products in the county are timber estimated at 63,994,066 running feet, firewood estimated at 531,025 stacks and production of seedlings estimated at 90,859,260 annually.

b) Protection of water catchment: Water catchment areas protection activities have been on-going especially in the Aberdares forest. The activities included rehabilitation of degraded sites and catchment areas, riverbanks stabilization and planting of water friendly trees.

c) Prevention of soil erosion: Tree planting in farms has helped in preventing soil erosion. Tree roots hold the soils firmly in the ground and act as windbreakers and increase soil fertility through litter fall from leaves which later form humus. The soil conservation structures practiced across the countyinclude retention ditches, grass strips, trash lines and Fanya Juu.

d) Provision of wood fuel and generation of energy for industries. Farmers enhance tree planting through tea processing industries by establishing tree nurseries, and supplying tree seedlings to farmers for planting. These industries buy mature trees from farmers who earn incomes while the industries get a source of wood fuel for their production.

e) Improved soil fertility by growing fertiliser trees: The departments of Agriculture and forestry have enhanced soil fertility improvement in the county by encouraging farmers to plant nitrogen fixing species of trees such as Acacias, Albizzia spp, Lencena spp, Sesbania spp and Calliandra spp in order to improve soil fertility through fixing nitrogen in the soil.

f) Growing of fruit trees for improved nutrition: Farmers have also been planting fruit trees like Avocadoes, Mangoes, Pawpaw, Macadamia and Oranges for commercial and for nutrition purposes. There are Mango, Macadamia and Avocado processing factories in the county. Tea, coffee and Macadamia nuts are also grown on commercial purpose.

g) Provision of carbon sinks: The carbon trade is an agreement made between a buyer and a seller of carbon credits. Those who reduce emissions or sequester carbon receive payments and those who have to decrease emissions can buy carbon credits to offset their emissions. Carbon offsetting means to compensate emissions which cannot be avoided by paying someone else to save – sequester - GHGs. The prices which are received for one ton of CO2 vary a lot and depend on the type of market and the type of carbon offset project. The County has not benefitted from the carbon sink programmes or projects for carbon trading. Trees grown on gazetted and un-gazetted land take-up carbon dioxide and produce

oxygen in the process of making wood, it is therefore expected that carbon trading projects will be initiated in the county so as to tap this potential.

h) Beautification activities: Beautification activities in towns, highways, schools and public places have been on-going across the county. Tree planting along highways/streets and in school compounds has been taken up as a programme by the Kenya Forest Service and various groups and individuals. Growing of trees around homesteads is an adopted practice in the county for beauty, shelter and fuel. Each calendar year, over 200,000 seedlings are planted along roads, urban centres and schools and public places

i) Animal feeds production ventures: Planting of fodder crops across the slopes have also been encouraged as soil conservation method and helps retain soil fertility in sloppy areas. Planting of fodder crops such as Napier grass, Leucaena spp and Cordia abyssinica spp have also boosted animal feed production by the department of livestock production.

j) Growing and processing of tree and crops for medicinal purposes: Medicinal crops like Amaranth and trees like Prunus spp, Moringa oleifera spp and Warbugia spp are also been grown especially in areas of Kangema, Kiharu and Maragua. Local herbalists purchase the raw plant parts for processing and sale within and outside the county.

k) The trees also form safe natural habitats for the wild animals in the high parts of the County.

1.17. Financial services

1.17.1. Number of banks, Micro finance institutions, mobile money agents and SACCOs with FOSAs

There are 7 commercial banks in the county (Barclays, Kenya Commercial Bank, Cooperative Bank, Equity Bank, Post Bank, Consolidated Bank and Family Bank), 6 Micro-finance institutions (SMEP DTM, Faulu Kenya, Kenya Women Finance Trust, Unaitas, Mentor Sacco and ECLOF) and 4 insurance companies (Britam, Invesco, APA, Kenya Orient and other small agencies). The County has 145 SACCOs.

These institutions are critical in the economic development through provision of financial services to the farmers, business people and the public in general. Apart from providing credit facilities, the financial institutions also advise the local people on the best businesses to venture into in order to get optimal returns. The government uses the financial institutions to channel funds to the vulnerable members of the population such as the social protection fund. The Youth Enterprise Development Fund and Women Development Fund are also channelled to the locals through financial institutions.

1.17.2. Distribution /coverage of financial services by sub-county

Residents access financial services in the respective sub counties. There are 3 banks in Murang'a South, 2 in Gatanga Sub-County, 1 in Kandara, 3 in Mathioya, 3 in Kangema, 1 in Kahuro, 6 in Murang'a East, and 3 in Kigumo. Mathioya, Murang'a

East, and Kangema have 1 micro finance.

1.18. Environment and Climate Change

1.18.1. Major degraded areas / hotspots and major contributions to environmental degradation

The county's main environmental pollutants are classified as emissions from Green House Gases (GHGs), agrochemicals from agricultural activities and factories, quarrying activities, and various other activities that pollute the environment through human induced activities and solid wastes from towns and markets. The GHGs disrupt atmospheric balance and global warming therefore heating the earth surface.

Solid wastes include plastic and polythene papers (banned), glass, human waste, animal waste, organic plant matter, synthetic materials, rubber and medical waste. Dumping and management of solid waste to the environment remains a major challenge for the County. Only Murang'a Town has a sewerage treatment plant. Makuyu, Maragua, Kangari and Kangema Towns as well as Kiria-ini, Kahatia, Kandara, Kenol and Kigumo Markets are in dire need of solid waste management facilities.

1.18.2. Environmental threats (Loss of biodiversity, drought, floods, Deforestation landslides, Coastal and marine erosion/pollution, Emergence of marine related diseases and epidemics, invasive species etc.)

Environmental degradation is the loss or reduction of ecological, biological, and economic productivity of the ecosystem. The County experiences its effects. This is due to over-exploitation of forests and unsustainable extraction of nonrenewable resources. Indiscriminate felling of trees in gazetted and non-gazetted forests has led to destruction of water catchment areas and consequently reducing river recharge base.

1.18.3. Solid waste management facilities

Currently, there is no robust solid waste management facility in the County. However, there is a proposed sanitary landfill facility at Mitubiri, co-funded by Murang'a County Government and Nairobi Metropolitan Authority (NAMATA).

1.19. Water and Sanitation

1.19.1. Water resources

Murang'a County's water resources are rivers, shallow wells, springs, dams, boreholes and roof catchment. There are 10 permanent rivers, 400 shallow wells, 75 springs, 30 dams and 100 bore holes that supply water for domestic and

agricultural use in the county. All these sources supply 60 per cent of the county population with clean and safe drinking water.

1.19.2. Water supply schemes

The county has 27 water supply schemes and about 16 irrigation schemes. Water supply schemes are managed by three different entities. There are some which are managed by the water companies, the department of water and others by the community members through water project committee. The irrigation schemes managed by the community members, get funding from community's own initiatives as well as through government and development partners' support.

1.19.3. Water sources and access (distance to the nearest water points by sub -county)

In the county, the mean distance to the nearest water point is 3 Km with about 29.4per cent of the households taking five to 14 minutes. Water supply schemes such as the Gatanga community water schemes supply water directly to households at reasonable cost. The county will expand the capacity of water schemes to ensure a minimum of 40per cent of the households are directly supplied with water.

1.19.4. Water management (Institutions, measures for sustainable use etc.)

Organized community groupings are partially funded throughUTaNRMP, WRUAs, FUAs, and others, to conserve the wetlands especially on the upper catchment areas of River Tana.

1.19.5. Sanitation

About 99.78 per cent of the households in the County use toilet facilities. Out of these, 4.97per cent use flush toilets, 3.97per cent use VIP latrines while the others use ordinary pit latrines. The majority of people living in the market and trading centres use ordinary pit latrines.

1.20. Health Access and Nutrition

1.20.1. Health Access (Health Facilities, Health personnel and their distribution by**sub county)**

The County has 272 health facilities serving a population of 959,701. It has one County referral hospitals and six sub-county hospitals, three mission and one private hospital. There are 26 public health centres, 114 dispensaries (89 public and 25 mission/NGO) and 137 private clinics.

The County has 1250 medical personnel working in government health facilities with 650 nurses, 39 doctors, 54 clinical officers, 138 public health officers and 38 laboratory technicians and technologists among other medical personnel. Health facilities in the county are inadequate and there is need to improve the situation.

1.20.2. Morbidity: Five most common diseases in order of prevalence

The most prevalent diseases in the County are: malaria/fever (2 per cent), flu (20.64 per cent) diarrhoea (11.45 per cent), respiratory tract infections (10.86 per cent) and stomach-ache (6.54 per cent). Morbidity situation in the county may change soon due to increasing number of motor cycle accidents. The health personnel have been spearheading campaigns to reduce the prevalence of the diseases especially for children less than five years.

1.20.3. Nutritional status (prevalence of stunting and wasting in children under 5 years: height-for-age, weight-for-height, weight-for-age)

Five per cent of children under five years are stunted and wasted. However, the medical personnel have been intensifying their effort to ensure that these figures comes down.

1.20.4. Immunization coverage

The immunization coverage stands at 92 per cent. Efforts are being made to ensure that all children are immunized against preventive diseases. The medical personnel have now changed the strategy of waiting for children to be brought to health, by moving from house to house to ensure that no child is left out.

1.20.5. Maternal health care (maternal deaths, number of mothers delivering in hospitals, ante-natal and post-natal care)

Deliveries by skilled health attendant were 54% with a maternal mortality of 107/100,000 during the year under review. There are concerted efforts to increase deliveries and reduce maternal mortalities. Antenatal attendance first visit was at 62% while the recommended fourth visit was 27%.

1.20.6. Access to family planning services/Contraceptive prevalence

Murang'a County has high usage of family planning services especially in urban areas. It is approximated that 86% of urban population has access to family planning services as compared to 33% of the rural population. The county aims to balance between population growth and economic activities since both have a bearing on the welfare of the residents.

1.20.7. HIV and AIDS prevalence rates and related services

HIV prevalence rate in the country is 6%, an average of 1.6 million people. However, the prevalence rate in Murang'a County is 5.2%, an average of about 58,666 persons. HIV prevalence rate in females and males is 9.8% and 1.2% respectively.

1.21. Education, Skills, Literacy and Infrastructure

1.21.1. Pre- School Education (Early Childhood Development Education)

The county has 1,000 ECD centres with total enrolment of 47,960 pupils and 1,503

teachers. The teacher/pupil ratio is 1:32.

1.21.2. Primary Education

The county has 512 primary schools, 5,993 teachers, total enrolment of 191,829 and a transition rate of 70 percent. The teacher/pupil ratio is 1:32. In this category there is a shortage of teachers which the county government and national will have to deal with in order to ensure that we attain the required ratio of 1:20. There is need also to improve on the transition rates in the county.

1.21.3. Youth polytechnics

The county has one \science and technology institute (Michuki Technical Training Institute), 65 youth polytechnics with a population of 7570 students, three accredited colleges and four non accredited colleges. All these are middle level institutions where the youth get skills suitable for the labour market.

1.21.4. Secondary Education

The county has 306 secondary schools, 4,095 teachers and a total enrolment of 103,946 students. This represents a gross enrolment of 71.04 percent. In this category, the government has attained a teacher /student ratio of 1:25. There is need to put more effort in ensuring that gross enrolment is raised to 90 percent.

1.21.5. Tertiary Education

The county has a public university; Murang'a University of Technology and a private university; Pioneer University.

1.21.6. Adult and continuing education

There are 127 centres in the county with 155 classes. The centres have 73 instructors on part time basis and 53 on full time basis. Enrolment is classified into Basic literacy, ACE primary, ACE secondary. The average enrolment is 358 for male and 1590 for female.

1.22. Sports, Culture and Creative Arts

1.22.1. Museums, Heritage and Cultural sites

The county has various cultural sites among them; Mukurwe-wa-Nyagathanga in Kiharu, Tuthu Cultural Site (Karuri WA Gakure) in Kangema, and Mugo (Chege) WA Kibiru Cultural Centre in Gatanga.

1.22.2. Sports facilities

There are various sports grounds in the county which include Rurii in Mathioya, Gen Kago in Kangema, Ihura and Mumbi grounds in Kiharu, Matenjagwo in Kandara, Kimorori in Maragua, and Gachibi grounds. There are other private health clubs spread across the county.

1.22.3. Libraries /information documentation centres/ Citizen service centres

Kenya National Library Services operates a library in Murang'a town. Also, there are information centres in Mathioya, Kangema, Kiharu, Maragua, Kandara, Gatanga courtesy of Community Empowerment and Institutional Support Project (CEISP) which was funded by African Development Bank (ADB).

1.22.4. Registered traditional herbalists, medicine-men, and conservationists

There are 30 registered traditional herbalists, medicine menand conservationists in the county.

1.23. Community Organizations/Non-State Actors

Most of the population in the county is organized into community self-help groups, categorized into two; producer co-operative societies and marketing cooperative societies. There are other non-state actors, both local and international Non-Governmental Organizations NGOs in the county whose goal is to advance the socio-economic wellbeing of the residents.

1.23.1. Cooperative Societies

The County has 322 registered co-operatives societies of which 259 are active 63 dormant and 17 collapsed cooperatives. These have a total membership of 303,936 and annual turnover of over Kshs 2,653,452,830.

1.23.2. Public Benefits Organizations (PBOs) i.e. NGOs, CBOs, INGOs, FBOs and special interest groups, etc.

There are 10 active NGOs, 95 CBO's, 1432 women groups, 457 CBOs, 800 youth groups, and 2,300self help groups. Their activities are pegged on the improvement of social and economic wellbeing of the entire population of the county. Other development partners in the county include Upper Tana Natural Resource Management Program (UTaNRMP), Danish International Development Agency) DANIDA, Japan International Cooperation Agency(JICA), Latter Day Saints charitable organization (LDS), Motivation Charity Trust Africa that supports people living with disability, Women Enterprise Fund, and Youth Enterprise Fund. The key NGOs operating in the county include: Vihda association, G.I.Z, Africa Now and YARD, among others.Also, there are 457 Community Based Organizations.

1.23.3. Development Partners e.g. UN Agencies, USAID, World Bank, etc. and the sectors they support

World Bank is supporting the proposed landfill in Kakuzi, while USAID and UKAID support the county in capacity building and development of various policy documents.

1.23.4. Youth empowerment and social inclusion (Youth empowerment

centres)

The county has 3,051 active women groups and 2,800 active youth groups. These groups operate with a view to pooling resources to uplift the economic and social welfare of the members.

1.24. Security, Law and Order

1.24.1. Number of police stations and posts by sub county

Security is paramount for peace, law and order. This conducive environment enables development and investment to thrive. It determines how much investment the county will attract and hence the level of economic development.

The county is faced with insecurity especially from the outlawed groups. Despite this challenge, the county has an effective security system, well-endowed resources such as the police stations, police posts, police patrol bases, and Administration Police camps, which are well distributed across the county. With the introduction of community policing, the county has a vibrant community policing unit in all the constituencies.

The table below shows the distribution of police stations, police posts and patrol bases within the county.

Туре	Number
Police Stations	12
AP Posts	161
Patrol Bases (KPS)	9
Police Posts (KPS)	7

Source: County Commissioner's office, Murang'a

1.24.2. Types, trends and crime prone areas

There is no one major type of crime recorded in the county. However, records indicate sporadic cases of kidnappings, armed robberies, muggings, pick pocketing, rape and other minor crimes spread across the county. The major cause of these crimes is identified as rampant joblessness, drugs and substance abuse amongst the youth. Betting has also been reported as a major cause with public appeal to the authorities to try nip the vice before it escalates any further.

1.24.3. Types and number of courts

Murang'a County has 1 High Court, 1 Chief Magistrate Court, and a Kadhi's Court based in Murang'a, 1 Senior Principal Magistrate Court and 1 Senior Resident Magistrate court at Kangema. Kigumo and Kandara have 2 subordinate courts each.

1.24.4. Prisons and probation services

The County has three prisons; Murang'a G.K. Main Prison, Maranjau GK Prison and

Murang'a Children Home Remand while Kigumo and Kangema Sub Counties have a probation office each.

1.24.5. Number of public prosecution offices

There are three public prosecution offices in the County one each in Kigumo, Kangema, and Murang'a East.

1.24.6. Number of prosecutions over the years

Kigumo Sub County had 2261 prosecution cases in 2017; Kangema Sub County had 930 prosecutions between July 2016 to June 2017 and 538 prosecutions between July 2017 and January 2018. Mathioya Sub County had 179 prosecutions in 2017; Kandara had 339 prosecutions in 2017, while Murang'a East had 2883 prosecutions in 2017.

1.24.7. Community policing activities

Community policing fora are active Countywide with activities conducted including:

- i. Organizing community fora to identify and come up with effective cause of action to solve crime problems arising from the county.
- ii. Conducting trainings between the police and Nyumba Kumi representatives to enhance a positive and active participation as well as improved police community relations in addressing crime in the county.
- iii. The police have improved patrols within the county and most especially within the major towns as per the information by the members of the public on crime trend.
- iv. Through community policing, county policing has come up with a way of solving conflicts between members of the public in a manner that it results in promoting peace and stability within the community.

1.24.8. Immigration facilities

The county does not have immigration facilities.

1.25. Social Protection

1.25.1. Number of Orphans and Vulnerable children (OVCs)

There are 8000 beneficiaries of the OVCT program.

1.25.2. Cases of Street children

There are no pronounced cases of street children since the department of social and interior department co-work to ensure the professional handling of arising cases. A proposed Family Life Training Centre will handle children rescue cases.

1.25.3. Child care facilities and Institutions by sub-county (children offices,

Number of orphanages, rescue centres, and correction/rehabilitation facilities

The County has 8 children offices located in each Sub County. The county has a children home in Kandara, Koimbi, and Murang'a Juvenile Centre.

1.25.4. Social net programmes in the county

The Orphans and Vulnerable Children Cash Transfer (OVC-CT) program has 8,000 beneficiaries, Older Persons Cash Transfer (OPCT) program has 6,500 beneficiaries, Cash Transfer for Persons with Severe Disabilities (CT-PWDs) has 807 beneficiaries, and the Hunger Safety Net Programme has 6,000 beneficiaries.

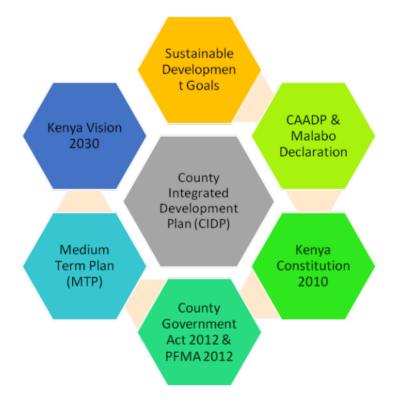

CHAPTER TWO: LINKAGES WITH VISION 2030 AND OTHER PLANS

2. INTRODUCTION

This chapter introduces integrated development planning and centrality of CIDP in the County Government development cycle. It further elaborates the linkages between this CIDP with other policy documents at the international, national and county levels.

2.1. Rationale of County Integrated Development Planning

Besides legal compliance as stipulated in various national and county laws, County Integrated Development Planning process is an exercise that envisions the position of a county in the future based on the analysis of the present and past experiences. It is a tool for projecting the desired future of the county through prudent prioritization of the needs of people of Murang'a using the scarce county resources.

2.2. Linkages of CIDP with other Policy Documents

2.2.1. CIDP Linkages with the County Government Act 2012

County Government Act 2012 stipulates the County governments to prepare 5-year integrated county development plans and the annual county budgets for their

implementation. Under Section 102 of the Act, county planning is to provide a platform for a unified sector-wide planning, budgeting, financing programmes, implementation, and performance review. The Act mandates the County Planning Unit for coordination of the integrated development planning. In addition, county planning shall serve as a basis for engagement between county government and the citizenry, other stakeholders and interest groups.

The Act further stipulates that the county government plans for the county with no public funds appropriated without a planning framework developed by the county executive committee and approved by the county assembly. It also states that the county planning framework shall integrate economic, physical, social, environmental and spatial planning. In addition to an integrated county development plan, each county is expected to have the following:

- i. A County Sectoral Plan;
- ii. A County Spatial Plan; and
- iii. A City and Urban Areas Plan.

These county plans (section 107(2)) "shall be the basis for all the budgeting and planning in a county".

2.2.2 CIDP Linkages with the Public Finance Management Act (PFMA), 2012

The PFM Act 2012 provides for effective and efficient management of public resources. Section 125 of the Act requires the budget process for county governments in any financial year to consist of integrated development planning process that include long term and medium term planning as well as financial and economic priorities for the county over the medium term.

Section 126 of the Act further obligates each county government to prepare an integrated development plan that includes strategic priorities for the medium term that reflect the county government's priorities and plans, a description of how the county government is responding to changes in the financial and economic environment; and, programmes to be delivered.

2.2.3 CIDP Linkages with the Urban Areas and Cities Act, 2011

Urban Areas and Cities Act (2011) is emphatic on the need for 5 year integrated development planning and the need to align annual budgeting to the plan. These plans are separate from those of the county. In section 36(2) it states that "an integrated urban or city development plan shall bind, guide, and inform all planning for development and decision-making and ensure comprehensive inclusion of functions."

2.2.4. CDP Linkages with the Constitution of Kenya, 2010

The Constitution of Kenya (2010) prescribes national values and principles of

governance which include sharing and devolution of power. It creates a two-tier government: a national government and 47 county governments. The constitution of Kenya 2010, 4th Schedule distributes functions between the National and County government. In order to realize the envisaged goals and targets, both national and county governments have to work together to fulfil the mandates as per the 4th schedule.

A total of 14 functions have been devolved to the counties. The main functions include county planning and development; agriculture; county health services; control of air pollution, noise pollution, other public nuisances and outdoor advertising; cultural activities, public entertainment and public amenities; county roads and transport; animal control and welfare; trade development and regulation; pre-primary education and village polytechnics; specific national government policies on natural resources and environmental conservation; county public works and services; firefighting services and disaster management; and, control of drugs and pornography. Emphasis is also made for the counties to ensure participatory development and capacities are developed at the county and community level.

Five Acts which provide the framework for devolution have been enacted, namely: Urban Areas and Cities Act, 2011; The County Governments Act, 2012; The Transition to Devolved Government Act, 2012; The Intergovernmental Relations Act, 2012 and The Public Finance Management Act, 2012.

The PFM Act 2012 provides for effective and efficient management of public resources. Article 125 of the Act spells out the budget process for county governments in any financial year. This is to consist of integrated development planning process, both long term and medium term planning, as well as financial and economic priorities for the county over the medium term. Articles 126 of the Act further obligates each county government to prepare an integrated development plan that includes strategic priorities for the medium term that reflect the county government's priorities and plans, a description of how the county government is responding to changes in the financial and economic environment; and, programmes to be delivered.

The County Governments are composed of the County Executive Committee and County Assemblies. The County Executive Committee supervises the administration and delivery of services to citizens as well as conceptualizes and implements policies and legislation. The County Assembly is a legislative organ with an oversight role on all County public institutions. The County Governments are required to prepare the County Integrated Development Plans to enable prioritization of socioeconomic development issues at the local level. This is mandatory before the funding of county projects and programmes.

2.2.5. CIDP linkages with the Kenya Vision 2030 and Medium Term Plans

The Kenya Vision 2030 is the national long-term development policy that aims to

transform Kenya into a newly industrializing, middle-income country providing a high quality of life to all its citizens by the year 2030 in a clean and secure environment. The Vision is anchored on three key pillars: economic; social; and political.

The Economic Pillar aims to achieve an average Gross Domestic Product (GDP) growth rate of 10 percent per annum and sustain the same till 2030 in order to generate more resources to reinvigorate the economy to meet its envisaged goals and aspirations. The key sectors in this pillar include: tourism, agriculture and livestock, manufacturing, wholesale and retail trade, Business Process Outsourcing (BPO) and financial services.

The Social Pillar seeks to build a just and cohesive society with social equity in a clean and secure environment. The main sectors under this pillar include education and training, health, water and irrigation, environment, housing and urbanization, gender, sports, youth and culture.

The Political Pillar aims at realizing a democratic political system founded on issue based politics that respect the rule of law, and protects the fundamental rights and freedoms of every individual in the Kenyan society.

The Kenya Vision 2030 is phased to be implemented in successive five year Medium Term Plans. The first plan covered the period 2008-2012. The second plan covered the period 2013-2017. The Medium Term Plan (MTP 2018-2022) is the third in a series of successive 5-year plans under which the Kenya Vision 2030 is to be implemented.

The Third Kenya Vision 2030 Medium Term Plan (MTP 2018-2022) will succeed the Second MTP 2013-2017. Like its two predecessors, it will be guided by Kenya Vision 2030 and the constitution of Kenya and incorporate the priorities outlined in the Manifesto of the jubilee government.

The 3rd MTP endeavors to move the economy towards a high growth trajectory to achieve 10 percent economic growth rate target by the end of the Plan period. It prioritizes policies, programmes and projects which generate broad based inclusive economic growth, as well as faster job creation, reduction of poverty and inequality, take into account climate change impacts, meeting the 17 Sustainable Development Goals (SDGs) and the goals of African Union Agenda 2063. The Plan builds on gains made so far in key sectors of the economy including completing projects initiated during the Second MTP. It targets not only at increasing the level of investment but also enhancing the productivity of investment, as well as raising productivity in all sectors of the economy.

To facilitate its implementation, the Plan will put in place incentives to attract both domestic and foreign investment including increased reliance on Public Private Partnership (PPP) arrangements in implementing programmes and projects. It will also take into account and promote use of new and innovative financing

mechanisms and other means of implementation.

County Government Act, 2012, stipulates that county government shall plan for the county and no public funds shall be appropriated outside a planning framework approved by the County Assembly. This Act along with the Public Financial Management Act, 2012, therefore calls for preparation of a County Integrated Development Plans (CIDPs) which must be aligned to the National Development Plan. In view of this, this County Integrated Development Plan is aligned to Kenya Vision 2030 and the Medium Term Plan 2018-2022. As such, the CIDP will provide the essential linkages by facilitating the implementation of Vision 2030 flagship projects as well as other projects and programmes that will ensure implementation of Kenya Vision 2030 at both levels of Government.

In addition, the county has also identified specific projects and programmes for implementation over the medium term period and these will go a long way towards achievement of the Kenya Vision 2030 and Sustainable Development Goals.

2.2.6. CIDP Linkages with Sustainable Development Goals (SDGs)

The Sustainable Development Goals (SDGs) are a collection of 17 global goals set by the United Nations in 2015 and are a successor of MDGs. The SDGs cover a broad range of social and economic development issues. These include poverty, hunger, health, education, climate change, gender equality, water, sanitation, energy, environment and social justice. Murang'aCounty shall align its projects/programmes to ensure they work towards achieving the seventeen goals as follows

Goal 1: End poverty in all its forms everywhere

All sectors shall ensure that their projects and programmes aim at ending poverty in the county. The planned projects and programmes shall address issues of unemployment, low income, insecurity etc. which undermines the wellbeing of the people.

Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture

The achievement of this goal shall be spear headed by agricultural sector to ensure the county end hunger and ensure access to safe, nutritious and sufficient food to all, particularly the poor and vulnerable including infants all year round.

Goal 3: Ensure healthy lives and promote well-being for all ages.

The health sector shall plan towards reducing the maternal mortality, end preventable deaths of new-borns and children under 5 years of age, end the epidemics of AIDS, tuberculosis, malaria, neglected tropical diseases, combat hepatitis, water-borne diseases and other communicable diseases that threaten the wellbeing of its people.

Goal 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

The county government is fully committed to offering quality education by employing more ECDE teachers, construction and renovation of ECDE classes and school

feeding program for early childhood development, care and pre-primary education. In addition, the education department shall offer quality technical and vocational training for all.

Goal 5: Achieve gender equality and empower all women and girls

All departments shall ensure there is no discrimination of women. This shall be achieved through adoption and strengthening of sound policies and enforceable legislation for the promotion of gender equality and the empowerment of all women and girls at all levels

Goal 6: Ensure availability and sustainable management of water and sanitation for all

The county through the water environment energy and natural resources (WEENR) sector shall strive to achieve universal equitable access to affordable safe and clean drinking water to address water scarcity. It shall also ensure people have access to adequate and equitable sanitation and hygiene to end open defecation.

Goal 7: Ensure access to affordable, reliable, sustainable and modern energy for all Energy sector

The energy sub sector shall plan to ensure the county has access to affordable, reliable and modern energy services and expand the available energy infrastructure.

Goal 8: Promote sustainable economic growth, full and productive employment and decent work for all

All sectors shall work together to ensure the county achieve higher levels of economic productivity through diversification, technological upgrading and innovation, focusing on high-value added and labor-intensive sectors. They shall also work towards promoting development-oriented policies that support productive activities, decent job creation, entrepreneurship, creativity and innovation and encourage the formalization and growth of micro-, small- and medium-sized enterprises.

Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Roads transport public works and utilities sector and industrialization shall achieve this goal through developing quality, reliable, sustainable and resilient infrastructure and promotion of inclusive and sustainable industrialization and foster innovation through the Trade and youths departments.

Goal 10. Reduce inequality within and among sub counties

The county shall ensure there is equitable resource distribution across its departments, sub counties, wards, and even across all villages.

Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable Urban

Land housing and physical planning sector shall ensure there is access to adequate, safe and affordable housing for all, basic services and upgrade slums. It shall also ensure there is enhanced inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management.

Goal 12: Ensure sustainable consumption and production patterns

The county shall achieve this goal by ensuring there is sustainable management and efficient use of natural resources and substantially reduce waste generation through prevention, reduction and recycling. This shall be done through department of water environment energy and natural resource. Promote public procurement practices that are sustainable, in accordance with national policies and priorities through department of this goal.

Goal 13: Take urgent action to combat climate change and its impacts

All sectors shall consider the issue of climate change in their plans by ensuring the counties achieve a strong resilience and adaptive capacity to climate-related hazards and natural disasters.

Goal 14.Conserve and sustainably use the oceans, seas and marine resources for sustainable development

The county shall ensure there is significant reduction of pollution to rivers that drain into the ocean. Water, environment, energy and natural resources sector shall ensure that there is little or minimal rivers pollution by coming up with mechanisms of controlling industrial waste drainage into the river and erosion of pesticides contaminated soil.

Goal 15:Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss

Environment sector shall promote the implementation of sustainable management of all county forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation.

Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

The county through department of administration and public service in collaboration with the national government shall achieve this goal through promotion of the rule of law in the county, equal access to justice for all, and corruption/bribery reduction, public access to information and by ensuring there is responsive, inclusive, participatory and representative in decision-making.

Goal 17:Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

Through department of finance and economic planning the county shall ensure it increases its revenue inflow by strengthening domestic resource mobilization mechanisms.

2.2.7. Linkages of CIDP WITH CAADP & Malabo Declaration

The constitution of Kenya 2010 stipulates that all international treaties and

agreements ratified by the government of Kenya shall form part of the Kenyan law. The Africa Union Joint conference of Ministers of Agriculture, Rural Development, Fisheries and Aquaculture held in Addis Ababa, Ethiopia from 1st and 2nd May 2014, resolved for member states to adopt a comprehensive Agriculture development programme. The resolutions were endorsed by the Executive Council, and in particular, the recommendations on adoption of commitments along specific and concrete priorities. These resolutions, besides supporting and facilitating preferential entry and participation of youth and women in agriculture promote enhanced policy and institutional support system, will strengthen and streamline the coordination mechanism. In particular, the resolutions stipulate pursuance of agriculture-led growth as a main strategy to achieve targets on food and nutrition security and shared prosperity. The resolutions further demands for creation of partnerships and alliances, and commitment to minimum allocation of 10% to agriculture development.

2.2.8. Linkage with MTP III and the "Big Four" agenda

The national government's "Big Four" agenda sets out priority programs and reforms to be implemented during the plan period (2018 – 2022). Building on the progress made thus far through implementation of CIDP ('13-'17), the programming of this CIDP (2018-2022) adopts the "Big Four" agenda as anchored in the MTP III of Kenya Vision 2030 which is in tandem with the national government vision which targets to:

- i. Support value addition and raise the manufacturing sector's share to GDP to 15 percent by 2022. This will accelerate economic growth, create jobs and reduce poverty;
- ii. Focus on initiatives that guarantee food security and nutrition to all Kenyans by 2022 through expansion of food production and supply, reduction of food prices to ensure affordability and support value addition in the food processing value chain;
- iii. Provide Universal Health Coverage thereby guaranteeing quality and affordable healthcare to all Kenyans; and,
- iv. Provide at least five hundred thousand (500,000) affordable new houses to Kenyans by 2022, and thereby improve the living conditions for Kenyans.

CHAPTER THREE: REVIEW OF IMPLEMENTATION OF THE PREVIOUS CIDP

3. INTRODUCTION

This chapter gives an overview of implementation status of previous CIDP (13-17) programmes and projects. It analyses county revenue streams (equitable share, grants and own source) comparing the budgeted versus the actual. The Chapter tabulates county expenditure by sector/sub sector comparing budgeted against the actual. It finally summarizes key sectoral achievements with focus on outcomes, and outlines the challenges and lessons learnt during the implementation.

3.1. Status of Implementation of the Previous CIDP

3.1.1. Analysis of the County Revenue Streams

The itemized revenue streams for the County from 2013/2014 to 2016/2017 FYs are summarized in the table below.

Table: 3.1: Analysis of County Revenue Streams

Local Revenue Sources / FY	2013/2014		2014/2015		2015/2016		2016/2017	
Department/Revenue item	Budgeted	Actual Revenue	Budgeted	Actual Revenue	Budgeted	Actual Revenue	Budgeted	Actual Revenue
Licenses	201,466,000	90,705,861	141,466,000	91,352,399	126,699,98 0	101,037,8 70	126,699,98 0	101,119,1 23
Plot Rent/Land Rates	94,853,280	42,772,431	94,853,280	43,097,517	73,758,168	48,341,14 6	73,758,168	45,816,21 6
Market Fees	83,429,000	41,983,685	83,429,000	44,983,309	59,900,000	50,231,81 5	59,900,000	35,292,09 5
Penalties	0	0	0	4,560,415	2,027,459	2,701,982	2,027,459	2,806,646
Building Material Cess (Sandstones)	101,277,140	45,941,259	101,277,140	72,851,539	101,180,99 4	70,653,54 9	101,180,99 4	58,177,92 8
Bus Park Fees	99,626,000	51,647,375	99,626,000	33,519,865	50,691,113	34,140,15 0	50,691,113	26,907,13 0
Parking Fee	0	0	0	17,777,510	29,000,900	21,439,74 0	29,000,900	19,233,49 8
Motor Bikes	13,669,700	8,877,845	13,669,700	10,748,905	14,701,600	10,998,69 0	14,701,600	4,740,250
Liquor License	30,657,020	12,751,605	30,657,020	18,401,900	32,845,000	39,136,10 0	32,845,000	31,093,76 0
Plan Approval	28,271,000	7,160,775	28,271,000	11,919,366	30,000,000	21,248,78 4	30,000,000	16,962,59 4

Local Revenue Sources / FY	2013/2014		2014/2015		2015/2016		2016/2017

3.3. Summary of key achievements versus planned targets

3.3.1. Public Service Management and Administration

A. Human resource

Most of the planned activities/ projects in 2013/2014 – 2016/2017 plan period were implemented. The sector received some support from the national government to undertake some projects/activities.

B. Public service

Challenges

- Inadequate funds for implementation of programmes/projects
- Disconnect between county leadership and activities undertaken by county devolved units
- Lack of clear defined channels of communications
- Resistance for change
- Inadequate consultation between department and agencies

Lesson learnt

- The importance of team work in achieving goals
- The need for well-coordinated channels of communication
- Organization culture is key to performance

C. Public Service Board

The board implemented all their planned activities during the periods.

Challenges for county services board 2013-2017

- Late disbursement of fund by the national government
- Re-allocation of funds at the county level
- Delay/late remittance of statutory deductions

- Inadequate funding for public participation carried out by the board
- Diversity of employees with different terms and conditions i.e. Officers seconded from National government, Former local authority employees and employee hired by the county public service board
- Political interference as the board carry out it functions
- Inadequate technical staff coupled by high number of semi-skilled workforce
- Ageing workforce
- Low number of applicant from other regions for the jobs advertised by the board

Lesson learnt

- Devolution is essential since it brings services closer to people
- Importance using local media to reach out to local community
- The input of department is key during recruitment process

D. Fire Services and Disaster Management Unit

This unit was not in place by the time the CIDP was being prepared but was created during the plan build and it was able to implement the activities assigned to it after its creation. The unit got a boost from development partners to make 50% planned projects/activities operational.

E. Enforcement Department

They implemented 50% of the planned activities/projects they had planned to undertake.

Challenges in Fire Services and Disaster Management

- Inadequate Staff
- Inadequate finances to run the department Programs and Projects
- Inadequate fire engines for response
- Inadequate fire hydrants around the county thus prolonged response time when the engine has to travel long distances for water refill
- Insufficient rescue equipment such as rope rescue and Emergency medical

gears

• Inadequate Personal Protective Equipment

Lessons Learnt

- At the launch of the CIDP 2013-2017, Fire services and Disaster Management Unit was not considered thus no legal framework for implementing projects. There is need to integrate all projects that the department intend to perform during a term.
- Lack of a proper structured units in the Coordination department delayed service delivery thus the need to develop, formalize and establish the disaster management unit to operate independently.
- The CIDP 2013-2017 was project based thus there was no program analysis to allow budget implementation. The new CIDP should adopt the program based budget so as to ensure the departmental plan aligns to the budget.

3.3.2. Finance IT, and Economic Planning

This sector is more of a service provider to the rest of the sectors in the county. During the plan period of 2013/2014 - 2016/2017, it implemented about 75% of its planned activities during the plan period.

Challenges

- The ICT unit is not a fully-fledged department thusunable to serve needs of the County Government in terms of automation.
- The ICT unit is understaffed
- Budget constraints
- Instability in network connectivity to run IFMIS.
- Change management in relation to automation of revenue.
- Unwillingness to pay penalties and interests accrued on property rates and ground rent.

- Delays in budget approvals.
- Inadequate office space and equipment for all the units in the sector. This has led to Units being scattered in different areas within the County Head Quarters posing a further challenge in communication and establishment of a LAN.

Lessons Learnt

- Cooperation between departments is important in improving service delivery.
- Need for more involvement of private sector in implementation of projects.
- Cooperation between the national and county governments is critical.
- There is need for good working relationship between the County Executive and Assembly.
- Training and development of staff is critical for continuity and stability in public service.
- Linkage between key county policies such as CIDP, Sector Plans, Spatial and Strategic Plans and ADP is critical.
- Legislations are important in attaining departmental goals and objectives.
- There is need to manage high public expectations through civic education and sensitization.

3.3.3. Education, Youth, Sports, Culture and Social Services

A. Youth Polytechnics

The sub sector implemented all their planned projects

Some of the projects implemented include:

- construction works in 6 polytechnics
- renovations in 2 polytechnics electrical wiring in 2 polytechnics

B. Sports

During the plan period, 58 stadiums/playing grounds were rehabilitated between 2013/2014 to 2016/2017 financial year and this boosted sport in the county.

Between the same periods, the sub sector issued 100 various sports equipment every year between 2013/2014 to 2016/2017 financial year to promote sporting activities in the county.

C. Social Services

Out of the 22 planned projects, it implemented 8 of them which translate to 36% achievement.

D. Culture

They had 6 planned projects of which they were able to implement all of them.

Lessons Learnt

- Most of the infrastructure in YPs is dilapidated and needs some improvement
- The tools and equipment in the YPs are few and run down
- Some of the YPs don't have adequate workshops and classrooms

3.3.4. Health

The health sector implemented around 95% of their planned projects.

The ones which were planned in 2013/2014 to 2016/2017 but were not implemented but still remain a priority; have been factored in the 2018-2022 plan period.

Most of the projects implemented were continuous in nature, whereas some of the projects which were not implemented to completion will be completed in the 2018-2022 plan period. This is one of the sectors which took a substantial amount of resources during this period of four years.

Lessons Learnt

- Prioritizing the projects when planning guides the implementation
- Resources were allocated as per the needs

Challenges

- Resources were scarce
- Budget controlled centrally
- The budget was not followed
- Delay in accessing funds as budgeted

3.3.5. Trade, Tourism, Investment, Agri-Business and Cooperatives

This sector achieved about 28% of project implementation of its planned projects due to inadequate funding.

Challenges

- 1. Inadequate Funding for the planned activities.
- 2. Poor coordination during implementation of the projects
- 3. Harsh climatic conditions hindered the implementation of tourism projects.

Lessons learnt

- 1. There is need to have adequate provision of funds for the planned activities to achieve the set objectives.
- 2. We should endeavor to coordinate all the key players during implementation of projects.
- 3. Environmental conservation should be promoted to counter the harsh climatic conditions.

3.3.6. Environment and Climate Change

This sector implemented all its planned projects even though there was no funding during 2013/2014 and 2014/2015 financial year.

Most projects were implemented in the 2016/2017 financial year as in earlier years of the palling period activities were very minimal due to inadequate financial resources.

Challenges

Inadequate funding

Lessons learnt

Align the specific funds to the specific projects

3.3.7. Lands, Housing and Urban Development

They successfully implemented around 50% of the total projects in the plan period

3.3.8. Roads, Transport, Energy, and Public Works

This sector had 2 programs with 10 sub-programs and successfully implemented all its projects.

This was a key sector because its cross-sectoral impact was big as this was considered to be an enabler of all other sectors of the county economy.

3.3.9. Agriculture, Livestock and Fisheries

In agriculture sub sector's planned projects, about 50% of them were implemented. However the establishment of the agro processing plants for value addition was not actualized due to inadequate funding. In Livestock sub sector, about 40% of planned projects were implemented. About 80% of planned projects in veterinary sub sector were implemented even though some not to 100% completion. In Agriculture sector it is in fisheries where it was observed that most projects not being implemented due to inadequate funding.

Lessons learnt

- 1. Not all proposals can go into the CIDP and thus prioritization and filtering is of essence.
- 2. The process of developing a CIDP is as socially as it is technical. The various actors have interests that need accommodating.
- 3. A lot of sensitization has to be done if the target community is expected to participate fully in identification and prioritization of projects.
- 4. Public participation should be allocated ample time and resources so that the community is taken through a vigorous SWOT analysis exercise to be able to identify itself.
- 5. For effective public participation, frameworks for information access need to be established. Further, public participation should be planned for in time and resources. Feedback mechanism should be established to ensure that the public gets reports on what gets to the plan and rationale for the choices made.
- 6. The future of irrigation development in the county should include among others construction of flood water storage structures due to climate change.

A. Crop Production

Challenges

- Inadequate and unreliable rainfall for crop production.
- Low soil fertility for crop production
- Unreliable marketing systems
- Poor road network

- High input prices
- High incidences of pests and diseases
- Inadequate staff to offer extension services
- Inadequate pre and postharvest management and value addition investments.
- Farmers averse to farming credit
- Land subdivision into non -economical units and conversion into real estates
- Poor access to quality planting materials.

Lesson learnt

• For projects to succeed there is need for support for both hardware and software like capacity building of beneficiaries and extension agents.

B. Livestock Production Challenges

- 1. Low staff to farmer ration leading to inadequate extension service provision
- 2. Inadequate and unreliable rainfall for fodder production.
- 3. Low quality and high cost of inputs and services

Lessons Learnt

- **1.** There is need for systematic implementation and proper follow up and monitoring to track projects progress
- C. Veterinary services sub sector

Lessons Learnt

- County AI programme is a county initiative to make it accessible to thepoor. Premium services can be left to the private sector as the two complement each other.
- 2. County AI services can manage to lower the market charges of an insemination.
- 3. Transport and consistent funding are critical to efficient and effective veterinary service delivery

D. Fisheries Sub - sector

Challenges.

1. Money allocation to our programmes was re-allocated to other sub sectors after every mid-term review.

2. Lack of support to fisheries programs in fuel and transport support to extension services provision.

Lessons Learnt

1. In order to reduce this reallocation of money the adherence to county integrated development plans will be followed.

2. Allocation of resources like fuel and vehicles/motor cycles should be allocated based on the Programmes implemented in order to improve effectiveness.

3.3.10. Water and Irrigation

In this sector most of the projects were fully implemented and some are still ongoing.

Lessons learnt

- 1. There is a planning complexity because whereas some of the projects are socially promising they are technically not feasible or would have little value for money.
- 2. Not all proposals can go into the CIDP and thus prioritization and filtering is of essence.
- 3. The process of developing a CIDP is as social as it is technical. The various actors have interests that need accommodating. However, in most cases social interests supersede technical considerations which could easily lead to skewed priorities and development.
- 4. A lot of sensitization has to be done if the target community is expected to participate fully in identification and prioritization of projects.
- 5. Public participation should be allocated ample time and resources so that the community is taken through a vigorous SWOT analysis exercise to be able to identify itself.
- 6. For effective public participation, frameworks for information access need to be established. Further, public participation should be planned for in time and resources. Feedback mechanism should be established to ensure that the public gets reports on what gets to the plan and rationale for the choices made.
- 7. Community participation in the development of smallholder irrigation schemes is of cardinal importance. Since these projects are initiated, owned, managed and operated by the beneficiary community, such projects must never be imposed on people if sustainability and ownership are to be assured.
- 8. The development of irrigation schemes requires technical, economic and social considerations before implementation. Any attempt to circumvent the project cycle can lead to far-reaching consequences.
- 9. The future of irrigation development in the county is construction of flood water storage structures due to climate change

CHAPTER FOUR: COUNTY DEVELOPMENT PRIORITIES AND STRATEGIES

4. Introduction

This chapter provides an overview of the County Spatial Development Framework. It outlines key County development priorities, strategies, programmes and projects as identified and prioritized during the public participation fora. The chapter further assesses natural resources endowment within the county and analyses County's competitive edge.

4.1. Spatial Development Framework

Table below describes spatial framework within which development projects and programmes will be implemented

Thematic Area	Overview/ Current Status	Policy Strategy	Potential Geographical Areas	Lead Agencies/ Departments
Industrialization	County produces adequate quantities of milk, avocado, Banana, mangoes, horticulture, coffee and tea	Establish a multi-processing unit for milk, avocado, banana, mango and French beans with supporting infrastructures (water, electricity, road network)	Lower part of Murang'a	Trade, commerce industry and Investment
Infrastructure	The infrastructure development in the county is not adequate to support the current potential capacity of the county production	Establish integrated, efficient, reliable, adequate, accessible, safe, sustainable and environmentally- friendly systems of infrastructure (roads; transport; energy;, training facilities; health; ICT; sewer; sports)	County Wide	Transport; Public Works; Infrastructure
Modernizing Agriculture	The county has rich fertile soil suitable for large scale agricultural activities.	Establish integrated irrigation system in the lower parts of Murang'a	Lower parts of Murang'a	Agriculture; Irrigation

Table 5: County Spatial Development Strategies by Thematic Areas

		Establish value addition industry for horticulture crops, milk, bananas (Grading sheds, milk coolers, dispensers)	County Wide	Trade, Industry and Investment; Agriculture; Marketing; Agribusiness
		Agribusiness specialized farm unit at Mariira	Mariira in Kigumo Sub County	Agribusiness Marketing; Trade, Industry and Investment; Agriculture
Tourism	The County has historical sites suitable for tourism attractions. However, the great potential is highly underutilized	Develop strategies for offering diverse tourist products for the respective tourism circuits (Mukurwe Wa Nyagathanga)	Mukurwe Wa Nyagathanga in Kiharu Sub County	Tourism, Forestry, KWS, Marketing,
	underutilized	Motor vehicle racing at Ndakaini	Ndakaini in Gatanga Sub County	
		Dating clubs and parks	County Wide	
		Beautify major towns to attract visitation (Murang'a, Kenol		
Transportation network	The county has underdeveloped transport network system that hinders free trade activities within and outside the county	Establish an integrated sustainable transport system through enhanced links and connectivity.	County Wide	Roads; Lands; Environment

4.2. Natural Resource Assessment

The Table below illustrates the major natural resources found within the county.

Table 6: Natural Resource Assessment

Name of Natural	Dependent Sectors	Status, Level of Utilization &	Opportunities for	Constraints to	Sustainable
Resource		Scenarios for future	optimal utilization	optimal utilization	Management strategies
Murang'a county has	Fisheries	The rivers are mainly used for	Best practices in	Water levels	Monitoring of water
several rivers . the major	Tourism	domestic water and rarely for	waste water	declined	levels and quality

		and consequently deaths.	modern technology		

Name of Natural Resource	Dependent Sectors	Status, Level of Utilization & Scenarios for future	Opportunities for optimal utilization	Constraints to optimal utilization	Sustainable Management strategies
			and machines. Making quarry sites accessible.		Formulation of policy to regulate quarrying.
Forests (Aberdare forest)	Kenya forest service Agriculture Tourism Wildlife Water Environment Lands	In Murang'a county forests are mainly found in the upper parts of the county. There have been deforestation due to encroachment of forest areas, illegal logging, use of firewood by tea factories ,forest fires.	Formulation and enforcement of policy to safeguard the forests. Establish of man- made forests for logging e.g. Timsales forest in Nakuru.	Deforestation. Illegal felling of trees, Forest fires.	Formulate policy to curb illegal felling of trees. Establishment of man- made forests. Deployment of more forest wardens. Procurement of firefighting helicopters. Planting exotic trees to minimize logging of indigenous trees.
Water Springs	Water Environment Kenya forest service	In the county there are a number of springs which can be protected to provide water for domestic and irrigated farming to the surrounding households. Most of them are in dilapidated state.	Springs protection programme county wide. Mapping of all water springs in the county.	Deforestation which leads to drying of springs. Pollution from farming residues	Springs protection. Formulation of policy on springs management.
Wildlife (snakes,monkeys,elephan ts,varvet monkey	Tourism Kenya wildlife service Agriculture	In Murang'a county they are found in Aberdare range. We usually experience human wildlife conflict.	Establishment of game reserves to enhance tourism local and international.	Destruction of agricultural crops Some pose health hazards to humans.	Construction and maintenance of electrical fence/barriers. Formulation of policy to allow conservation of wildlife. Designating land for wildlife conservation.

Name of Natural Resource	Dependent Sectors	Status, Level of Utilization & Scenarios for future	Opportunities for optimal utilization	Constraints to optimal utilization	Sustainable Management strategies

4.3. Development Priorities and Strategies

This section provides a summary of the development priorities identified in the sectors from the sectoral plans and during stakeholder's consultative forums. The programmes are linked to the Kenya Vision 2030, MTP and Jubilee administration 'Big Four Agenda', County Transformative Agenda, as well as the Governor's manifesto. The programmes are further formulated to attain the provisions of Article 56 of the Constitution of Kenya 2010 in addition to achieving the aspirations of Sustainable Development Goals (SDGs), African Union Agenda 2063, CAADP and Malabo declaration among others. The implementation of the programmes envisage a green economy that shall be achieved through integrated mainstreaming of cross-cutting issues such as gender, youth and PWDs, disaster risk management, HIV/AIDs as well as climate change and environment degradation.

4.3.1. Public Service & Administration

Sector Composition

- 1. Public Service
- 2. Public Service Board
- 3. Governorship
- 4. County Assembly

A. Human Resource Management

Vision

To be the leading sector in policy formulation, implementation, coordination, supervision and prudent resource management.

Mission

To provide overall leadership and policy in resource mobilization, management and accountability for quality Public Service delivery

DEVELOPMENT NEEDS	PRIORITIES	STRATEGIES
Strategic fit between Human Resource and the organization strategy.	Strategic Human Resource Plan	 Develop and operationalize the Strategic Human Resource plan. Develop a transformative organizational culture.
An appropriate County Organizational structure and workload analysis	County organizational structures	 Carry out a workload analysis Develop and review county organizational structures
Adequate and Properly placed Personnel	Recruitment and maintenance policy	To develop and implement the recruitment and maintenance policies.
Continuous Capacity building	Training and Development policy	 Develop and implement Training and Development policy. Leadership development and team building.
Results Based performance	Effective and efficient Performance Management System	 Develop and implement performance management system. Develop a reward and sanction framework. Establish Monitoring and evaluation policy. Training on performance management.
Employee Welfare	Employee welfare policy	Develop and implement an employee welfare policy
Cordial Industrial Relations	A County industrial dispute resolution framework	 Establish a liaison office. Establish an industrial dispute resolution committee.
Easy access to Human Resource Records	Effective and efficient record management system	 Acquire adequate and secure filing system. Digitize all manual Human Resource Records. Training on records management
Automation of Human Resource functions	Upgrade the existing Human Resource information System	 Operationalize other inactive IPPD system functions. Linking the IPPD system with key

Programme 1: Administration, Planning and Support Services

B. Public Service Board

Vision

Provision & Development of Human Capital with a Difference.

Mission

To Transform Murang'a County Public Service to be Efficient & Effective in Service Delivery

Goal

To ensure attainment of the overall objective of the County Department

STRATEGIC OBJECTIVES

The main strategic objectives of the sector are:

- Increased morale among County Public Service staff
- Improving Positive work ethic in County Public Service.
- Improved work environment.
- Service Transformation
- To establish a skilled and adequate workforce in the County PublicService
- Promotion of National Values and Principles in the County Public Service

Development Priorities

The development priorities are:

- Promotion of best labour practices in recruitment,
- Allocating, motivating and effectively utilizing human resources for improved public service delivery
- Promotion of public service integrity

Development needs, priorities, and strategies

DEVELOPMENT NEEDS	PRIORITIES	STRATEGIES
Promotion of best labour practices in	Establish and abolition of offices;	Formulate human resource policies and plans
recruitment, allocating, motivating and effectively utilizing human	Recruitment of competent staff to fill the offices,	that embraces career profile matching and staff performance
resources for improved public service delivery	Human resource management and development	Undertake Training and capacity building
	Performance Management	
Promotion of public service integrity	Promotion of values and principles of public service' Evaluation of the extent to which the values and principles have been complied with	Sensitization of staff on values and principles; Public participation; Undertake compliance audits and forward the reports to the relevant authorities

			Indicators	Year 1	Year 2	Year 3	Year 4	Year 5	Total Budget
Training and capacity building	Competent and motivated workforce	Need for skills improveme nt	Number of staff trained	5 day training for every member of staff	5 day training for every member of staff	5 day training for every member of staff	5 day training for every member of staff	5 day training for every member of staff	100M
	Improved service delivery	Need for improved service delivery	Increased Employee and customer satisfaction	Develop a service charter	M & E compliance with the service charter guidelines	M & E complianc e with the service charter guidelines	M & E complianc e with the service charter guidelines	M & E compliance with the service charter guidelines	
Recruitment and selection	Adequate and highly skilled personnel in all departments	To establish staffing needs for each departmen t	Number of personnel recruited in every department	Number of staff recruited in line with the budget	Number of staff recruited in line with the budget	Number of staff recruited in line with the budget	Number of staff recruited in line with the budget	Number of staff recruited in line with the budget	150M

Table 7: Cross-sectoral impacts

3.5.3.3 Cross- Sectoral Implementation Considerations

Programme Name	Sector	Cross- Sector Impact		Measure to Harness or mitigate the impact
		Synergies	Adverse Impact	
Recruitment	-Public Service Management -Finance & Economic Planning - County Assembly	More productive workforce -Improved Governance and accountability	-High wage Bill. -Political interference	-Voluntary early retirement -Enhance efficiency in resource mobilization
Training & Development	-Public Service Management -Finance & economic planning	-Effective service Delivery. -Prudent financial management	-High training cost -Resource constrains	-Partnership with training Institution and other agencies -Diversify sources of grants and aids for training
Promotion of values and principles of the public service	All MDA and community	More informed public servant and other stakeholders Improved integrity	Resistance High cost	Capacity building Collaboration with other agencies

C. Governorship

Vision

To be the leading sector in service delivery to the satisfaction of the public.

Mission

To provide overall leadership and policy direction in resource mobilization, management and accountability for quality public service delivery.

Goal

To deliver quality service to the public

Development needs, priorities, and strategies

DEVELOPMENT NEEDS	PRIORITIES	STRATEGIES
Enhance Coordination of County Government	Improve efficiency in coordination	 Hold regular meetings
functions.		Employ an ICT System
Improve communication within and outside the County	Optimized communication channels	 Enhance communication infrastructure Consistivity building
		Capacity building
Enhance Monitoring and Evaluation function.	Implement the M & E Policy	 Fast track approval and Operationalization of theCounty M& E policy Set up County Integrated Monitoring &
		Evaluation System (CIMES)
Effective office and field Administration	Support in terms of resource allocation.	Capacity Building
Prevention and Reduction of alcohol and drug abuse	Public Awareness creation and enforcement of existing laws.	 Sensitization and awareness creation Strengthening and reviewing of county laws Establish treatment and rehabilitation
		system
Enhance enforcement functions in the County	Recruitment and training of enforcement personnel	 Allocate adequate resources.
Strengthening Legal Services	Operationalize legal department	 Allocate adequate budget
		Engage competent legal professionals
Improve Disaster Preparedness	Support through adequate resource allocation	Personnel Capacity Building
		Sensitization Programs
		Provision of Firefighting Equipment

4.3.2. Finance ITand Economic Planning

Sector Composition

- Finance
- ICT
- Economic Planning

A. Finance

Subsector composition:

- o Budget Management
- o Administration
- o County debt management
- o Accounting, Financial standards and reporting
- o Procurement and supply chain management
- o Internal Audit
- o Resource Mobilization and Revenue
- o County corporations and Asset management

Vision and Mission

Vision

County Government Services and programmes effectively and efficiently delivered.

Sector Mission

To ensure that all programmes and services are budgeted for, approvals acquired and necessary subsequent systems are adhered to.

Subsector Goal

To achieve the programmed activities **Development Needs, Priorities and Strategies**

Sub-sector	Development needs	Priorities	Strategies
Finance Administration	Training and Capacity building	Training	 Training needs assessment Engage professional trainers
	Sub county offices	Expansion of County Treasury	- Personnel Deployment
Budget management	Plan for the development needs	Establish viability	 Hold consultative public forums
		Monitoring	- Follow up on whether the project is within the scope
		Evaluation	- Achievement of the intended purpose
		Reporting	 Preparation of monthly, quarterly, Mid-term and annual reports

Internal Audit	Training and Capacity building	Training	 Training needs assessment Engage professional trainers
	Establish Internal Controls	Audit system	- Installation of Team mate Audit System
	Audit Committee	Establish Committee	- Advertise and fill posts
	Logistics	County Audit Visits	- Purchase of motor Vehicle
ICT Development	ICT training and capacity building	Training	 Conduct training needs assessment Contract training professionals Establish needs Implement solution to the needs
	Local Area Network in sub counties	Conduct a survey in all sub counties	 Engage professionals Implement the LAN as per the recommendations of the Survey
	Wide Area Network	Conduct a survey on the best method of implementation	- Engage Service providers
	Telephony connection (PABX) project sub-county	Provision of efficient and effective communication within the County to enhance service provision.	 Engage professionals to implement the project
	Acquisition of computers	Establish needs and raise requisitions	 Provide specifications Engage Suppliers
	Information Resource Centres(Ujumbe)	Refurbish the existing resource centres and establish new ones	- Engage various professionals
	Installing of wireless connection in all subcounties	Establish the major towns to be connected	- Engage service provider
	E-Government	Establish a service delivery system across the county	 Engage Professionals Interdepartmental partnerships

Media Library Public awareness creation programs	Procurement of media production equipment and editing software Communications unit will engage other departments in creating public awareness and developing the programs	 Identify and refurbish a media room Provide specifications Engage Suppliers Hold meetings with all departments and develop action plans
Develop a bulk short message service and a short code platform to collect feedback from the public	Create awareness to the General public	Provide SpecificationsEngage a service provider
Training and Capacity building	- Training	 Training needs assessment Engage professional trainers
IFMIS Expansion to sub counties	- Expand IFMIS to sub counties	- Engage National Treasury
Training and capacity building	- Training	 Training needs assessment Engage professional trainers
Deployment of staff	 Increase workforce in the asset subsector 	- Engage Human Resource Department
Asset valuation	- Value all county assets.	- Engage professionals
Tagging of county assets	- Label and tag all county assets	- Engage professionals.

Procurement and Supply Chain Management	1. Capacity building and training	a) Training	 Ensure that officers in the Supply chain sector are adequately trained in Procurement and supply chain management. Ensure that the officers working are professionals and have their practioners licenses.
	2. E-procurement system	b) Professionalization	 Prepare a tender for the same Train relevant staff on the
	Stores management system	a) An integrated system	 system Have a fully operational e- procurement system Build or set up an extra and modern store house
		 a. Put in place an efficient stores and Record keeping system 	 Prepare a tender for acquisition of a stores- management system. Train relevant staff on the some
Revenue Mobilization	Revenue automation and revenue collection administration A .	i. Installation of e- revenue collection system	same. Identification of the e-revenue system. Procurement.
			Training of users Rollout of the system.

			2.
	Natural resource inventory analysis modelling and exploitations	ii. Mapping of natural resources within the county	Identification of resources within the county.
	Mapping of revenue streams	iii. Carrying out research on potential revenue streams.	Identification of unexploited revenue streams.
	Resource and revenue policy advisory and research	iv. Preparation of county revenue policy	Legal framework. Identification of the relevant stakeholders. Policy formulation. Presentation county executive committee. Approval by the county assembly.
Sub-Sector	Development Needs	v. Priorities	Strategies
Economic planning	County Economic policy Formulation ,modelling and management	vi. Preparation requisite county policy documents.	Preparation of ADPs Preparation of CBROP Preparation of CFSP

		Development of a county strategic plan Preparation of CIDP 2023-2027. Convening CBEF committee meetings
County policy review and reporting.	Review the implementation of CIDP 2018-2022 Monitoring and Evaluation framework. vii.	Midterm review 2018-2022 End term review 2018-2022 Continuous Monitoring & Evaluation of county projects and programmes
Economic and statistical research and advisory.	Conducting Statistical surveys	Data collection Updating county fact sheet

Cross-Sectoral Implementation Considerations

Table 10: Cross-sectoral impacts

Programme Name	Sector	Cross-sector Impact		Measures to Harness or Mitigate the Impact		
		Synergies	Adverse impact			
Budget Management	Finance,ICT & Planning	 Mobilization of community by interior and national coordination department to take part in public participation. Creating public awareness by advertising through both electronic and print media by following the laid down procurement procedures. Submission of Draft budgets by other sectors 	 Low public participation Partial compliance with the budget Unrealistic budget 	 Sensitization Monitoring and evaluation Prioritizing expenditures within the departments 		
Development of County ICT infrastructure	Finance, ICT & Planning	- Transport, Energy and infrastructure - Agriculture, Livestock and	 Departments are different locations Challenge in market diversity 	 unified connectivity Constant review of upcoming products Quick response by the service 		

		Fisheries.	 Frequent internet outages Bureaucracy by CAK on provision of Communications standards on provision of Communications standards 	provider • Engage Key decision makers. •
ICT Development	Finance, ICT & Planning	 Provision of ICT Standards by Information Communications Technology Authority (ICTA) Provision of Internet by service providers (Telkom and Safaricom) Provision of standards by Communications Authority of Kenya (CAK) Partner with Ministry of information Communications and Technology (National Government) for information sharing. 	 Challenge in market diversity Frequent internet outages Bureaucracy by CAK on provision of Communications standards 	 Constant review of upcoming products Quick response by the service provider Engage Key decision makers.

Public Management Audit	Finance,ICT & Planning	 Provision of Audit standards by Institute of Internal Auditors Advice by internal auditors on risk management. Consultation with external auditors on risky areas 	 Poor communication from the institute Nonexistence of Audit committee Inadequate information 	 Frequent follow up on the newly introduced standards Establish an audit committee Enhancement of internal checks
Accounting financial standards reporting	Finance, ICT & Planning	 Provision of Accounting standards by IPSAS Provision of Financial reporting matters guidelines by National Treasury Provision of financial management information system by (IFMIS)National treasury 	 Non familiarity with some of the standards Fixed chart of accounts Frequent downtime Existing nonoperational IFMIS Modules e.g. Revenue module 	 Training Familiarize with the standards Constant review of chart of accounts to suit specific needs of stakeholder s Improve on network coverage Follow up on completion of the system
Finance	Finance, ICT &	Coordinate Finance matters	Lack of coordination	Enhance

Administration	Planning	across functions	across departments	communication
County corporations and asset management	Finance, ICT & Planning	Provision of Accounting policy for assets guidelines by National Treasury	Lack of correct interpretation of the guidelines	Training and sensitization
Procurement and Supply Chain management	Finance, ICT & Planning	 Long and tedious procurement system Late requisitions or urgent user demands 	 The procurement process is a long one and very tedious hence at time things that need to be procured will have to take time before they are procured The user departments are always in a rush to have their items bought. At times things that they could have foreseen and requisite for ago end up being requisite for late. Due to the late or untimely requisitions, the departments always want 	 The Public Procurement Act '16 is clear on the timelines for each method of procurement so there can be no shortcuts. The departments need be actively proactive since
		 Laxity by user departments to follow procurement procedures Lack of executive policy 	 shortcuts to avoid the long procurement process. The lack of an executive/cabinet policy in some cases makes procurement of certain goods/services have the user departments' 	the procurement plans and budget are there to act as their guides so that they make their needs in advance.

			 The departments should be taken through a sensitization meeting whereby they will be taught on how the procurement and disposal system works so that they are well aware and conversant with it. There should be and executive/cabin et policy clearly outlining the projects to be focused on so that all our energies are put there is goodwill and cooperation from all the departments.

4.3.3. Education, Youth, Sports, Culture, and Social Services

Sector Composition: Education, Youth, Sports, Culture and Social Services

A. Sports Sub Sector

Vision

Sports Promotion for All for Economic Development and Healthy Living

Mission:

Be a Leader in Sports Development

Goal:

Sports Development

Sub-sector Development Need Priorities and strategies

Development Needs	Priorities	Strategies			
Promotion of sports among youths	Talent identification	Recruiting of coaches			
	Infrastructure Development	Rehabilitation and Construction of Sports Stadia			
	Talent Academy	Recruiting of coaches			
	Sports equipment and tools	Procuring of tools and equipment			
DEVELOPMENT NEEDS	PRIORITIES	STRATEGIES			
Dilapidated Community cultural centers and social halls	Development of Mukurwe wa Nyagathanga	MCG to partner with NMK and other stakeholders to fund and implement the			

	 rehabilitation of social halls Rehabilitation of cultural sites in the county 	projects
Youth unemployment and untapped talent	 Establishment of a cultural studio Nurturing and development of talents e.g. in music, dance and drama 	Talent development
Lack of recognition of heroes and heroines	Freedom fighters	Construction of monuments to honor legends
Lack of facilities to showcase talents	Construction of county theatre	Development of county theatre and promotion of film and arts festivals

4.3.4. Health

Development Priorities and Strategies

Vision

A healthy and Nationally Competitive County

Mission

To provide quality health care service that are accessible, equitable and sustainable to the population of Murang'a County and beyond.

Sector/ subsector Goal

Better health in a responsive manner

Focus

Focus on elimination of communicable conditions, halt and reverse the rising burdens on Non-communicable Conditions, reduce burden of violence and injuries, provide essential health services, minimize exposure to health risk factors and strengthen collaboration with health related sectors

Sector/subsector Development needs, Priorities and Strategies

Equipping all the health facilities to meet the universal health coverage needs Dispensaries • Incidence and re-emergence of diseases. •Strengthen	vel V facilities-(infrastructure).	MCG to partner and lobby with The National Government and development partners to fund and implement the projects. MCG to partner and lobby with The National

4.3.5. Trade, Tourism, Investment, Agri-Business, and Cooperatives Sector composition:

- 1. Trade Development and promotion
- 2. Tourism
- 3. Industrial Development and investment
- 4. Cooperative Development
- 5. Agri-Business

Vision:

A county with a robust investment and trading environment

Mission:

To provide a conducive environment for trade, investment and industrial development through policy and partnerships.

Sector/ subsector Goals:

- To promote local market development, policy, enterprise development and access to finance.
- To promote industrial growth and investment for sustainable development
- To promote cooperative development in the county
- To promote tourism development in the county

Development Needs, Priorities and Strategies

Development Needs	Priorities	Strategies
Trade development and promotion		
Markets sheds and collection centres	Market developments	Construct markets and grading sheds in all the wards
Basic amenities in markets	Construction of sanitation blocks	Construction of sanitation blocks in all the markets
Roads infrastructure	Grading of all roads leading to the market areas	Upgrade all feeder roads leading to markets
Water, security and sanitation	Avail piped clean and safe water in the market Centres, lighting	Connect all markets with clean water.
Efficient markets	Easy access to markets	Open up roads in the rural areas
Agro Marketing services	Marketing of farm products	Marketing groups, pricing strategies
Capital for business	Facilitatesaffordable ,accessible ,available credit facilities to traders	Government supported Sacco and other financial institutions
Product development and promotion	Promotion products identification	Identify products for possible branding in partnership with Export promotion Council(EPC)
Industrial Development and investment		
Agro processing, manufacturing and value addition	Agro-processing, manufacturing of farm produce	Establishment of multi product processing units.
Producer Groups and Cooperative Societies	Access to markets-milk, coffee, tea, avocadoes, French beans, mangoes, bananas	Strengthening existing producer groups and cooperatives through capacity building in business model formation, to provide value added products

Access to markets	Market linkage local and international	Promote market research ,establish market linkage for various commodities Form marketing groups and capacity building on contractual marketing, product development and branding
Agribusiness information and communication	Development of agribusiness portal	Promote e-marketing for agriculture based produce and products
Transformation of agricultural enterprise	Transform agricultural enterprises from subsistence to agribusiness.	Commercialization,
Local and export Development and promotion	Product promotion and communication	 Inter- county trade promotion Establishment of e-marketing centres within the county Investors conferences
Building Institution capability	Capacity building	capacity build staff in various areas setting up of business incubation centres
Inclusion of youth and women in agribusiness	Social inclusion	Develop youth and women friendly technologies –e.g. Value addition
Collection and grading sites for agricultural produce.	Common collection Centre's for agricultural produce and products	Organize and train groups to market together
Cooperative development subsector		
Cooperative societies	Access to markets-milk, coffee, tea, avocadoes, French beans, mangoes, bananas	Strengthening existing cooperatives, governance, formation of business model, reviving coffee societies to provide value added products
Consumer Protection subsector		
Consumer protection Access to quality, affordable and safe	Quality and pricing of products	Verification and calibration of weighing equipment.

products		
Access to timely services	Timely services to the consumers.	Establishment of weights and measures laboratory in the county.
Legal control of pre packed goods exposed for sale	Routine inspections to ensure accuracy in goods sold.	Carrying out routine inspection on all retail and wholesale premises.
Control and regulation of trade	Ensure sufficient information on the label to describe the pre-packed size	Implementing the Labelling of goods Act by ensuring the goods labelled are clearly marked with name, address, net weight, and the expiry date.
Standardization of the package sizes	Consumer awareness and sensitization	Eliminate 'odd size' as a means of price cutting in order to eliminate unfair commercial advantage. Eliminate deceptive packages from all retail and wholesale premises.
Tourism sub sector	1	
Tourism development	Tourism attraction sites, marketing and capacity , tourism product development	 Developing and diversifying tourism products e.g. Agricultural tourism and cultural tourism, MICE(meetings, incentives, conferencing & Events)Nokras, Golden palm. Eco tourism and water tourism e.g. rapid camp. Cultural festivals Branding

4.3.6. Environment and Climate Change

Subsector composition

Environment and Climate Change

Vision

A clean, secured and sustainably managed environment and natural resource conducive to county prosperity

Mission

To promote, monitor, conserve, protect and sustainably manage the environment and natural resources for county development

Sector/ subsector Goal

A class provider of sustainable environmental issues.

Development needs, Priorities and Strategies

Development needs	Priorities	Strategies
Environment management and protection	Proper waste management mechanisms	Lease/procure waste collection vehicles
	Prevention of noise and air pollution	Mounting of litter bins
		Construction of refuse chambers
		Improvement of waste disposal sites
		Provision of waste collection tools
		Acquisition of noise meters
		Development of solid waste laws
Natural Resources Conservation and	To increase farm forest cover	Establishment of tree nurseries
Management	To rehabilitate degraded sites	Procure and distribute tree seedlings
		Rehabilitation of degraded quarries

		Water catchment areas protection
Climate change resilience building	Promotion of clean energy	Promotion of energy saving jikos
	Integrate climate change measures into county policies strategies and planning	Development of climate change laws
environmental education and awareness	Capacity building on environmental issues	Sensitization of the public on environmental issues

4.3.7. Land, Housing and Urban Development

Sector composition:

- Lands and Survey
- Housing
- Urban Planning
- Urban Development

SECTOR Vision

• Sustainable utilization of land, adequate and affordable housing for all and controlled planned areas within the county.

SECTORMission

• To provide an integrated spatial framework for coordinating development efforts by promoting efficiency in land administration, management and access to adequate, affordable an sustainable housing within the county.

Subsector goals:

Lands and survey:

Ensure effective management of land and easy access to land ownership information

Housing:

Provide adequate and affordable housing for all

Urban and Regional Planning:

Ensure controlled development in urban and market centres

Urban development

Ensure safe, accessible and sustainable services for urban populations.

Sector Needs Priorities And Strategies.

Sector/subsector Development needs,	Priorities	Strategies		
Clean and conducive environment	Sustainable solid and liquid waste disposal mechanism	Establishment of designated landfills and dump sites and disposal sites Establish solid waste collection and segregation mechanism		
		Open up drainage systems		
Inadequate sanitation facilities e.g. public toilets, waste receptors, waste disposal sites	Sustainable solid and liquid waste disposal mechanism	Designate waste collection sites Construct public pay toilets		
Urban sprawl/ Unplanned settlements	Prepare Integrated plans of all urban centres and towns	Supporting and facilitating development control Preparation and implementation of development plans Develop by laws Implement Urban Centres and Cities Act		
Poor management of urban areas	Set up urban management system	Implement Urban Centres and Cities Act		
Inadequate urban housing(rental) and associated infrastructure	Provision of land for housing and industrial development	Establishment of affordable housing scheme e.g. tenant purchase and PPPs Preparation of part development plans		
Insecure land tenure and land conflicts	Succession programs Planning, survey and mapping of all urban plots Establish ADR mechanisms	Issuance of ownership documents- leases and titles		
Management of public land	Repossessing and securing public land	Planning and surveying		
Recreational facilities and other open spaces	Zoning of parks, open spaces and play fields	Establish urban parks Beautification of open spaces		
Land ownership information for public and private land	Installation of Land information management system	t Staff capacity building (GIS) Rationalization of staff holding land records		
Low public awareness on land and planning	Public sensitization	Enhance public awareness about access to		

matters	Resolution of succession matters	digital	land	information	through	Huduma
		centres	5

Cross-sectorial Impacts

Programme Name/ Location	Sector	Cross Sector Impact		Measures to Harness or Mitigate the Impact
Location		Synergies	Adverse Impact	
Administration, Planning and Support	- Finance - ICT - Procurement - Public works - Human Resource	 Provision of financial services, acquisition of goods, services and adequate personnel, establishment and installation of appropriate infrastructure. Facilitation on training services materials and Staff allowances 	 Risk of delayed funds and negligence due to other political priorities by other departments. 	- Ensure timely preparations of budgets and proper coordination of activities with the other departments.
Land Survey, Mapping	 Physical Planning Urban Development and Management Housing Valuation and Asset Management Education Sports Administration Public Service Finance Water, Environment and Natural Resources 	 Securing of public land Efficient storage and retrieval of land information Timely and efficient update of land information 	 May lead to displacement of people Negative public perception 	 Undertake public participation Public-private partnership Collaboration with NLC and other government agencies
HousingAffordable housing, -Estate management, -Housing Development Agency,	 Physical Planning, Urban Development and Management (Sub-County Administration) Valuation and Asset 	 Provision of adequate social and physical infrastructure within the housing development programme Optimal utilization of space 	- Risk of gentrification	 Transparency and accountability from project planning to house allocation and project monitoring Capping of house selling

-ABT Technology Dissemination, -Upgrading of informal settlements	Management - Land Survey and GIS - Water, Environment and Natural Resources - Roads, Transport and Public Works - Finance	 through land use planning Accurate land valuation for preparation of housing models and future rating Appropriate boundary establishment Incorporation of environmental considerations in housing development 		prices, rent and utility rates to values that are affordable by the targeted beneficiaries
Urban and Regional Planning	 Land Survey and GI Valuation and Asset Management Finance Education, Gender, Culture and Social Services Health Youth, Sports, ICT and Communication Administration Administration Public Service Water, Environment and Natural Resources Roads, Transport and Public Works Trade, Tourism, Industry and Enterprise Development Agriculture, Livestock and Fisheries 	 Controlled development Increased revenue generation Clear zoning and building guidelines Protection of wetlands and ecologically fragile areas Encourage investments Enhanced land values Conserve agricultural and forest areas 	- Risk of poor public perception	 Undertake proper public participation Continuous public sensitization

4.3.8. Roads, Transport, Energy, and Public Works

Vision

To be the leading provider of cost effective, physical infrastructure facilities and services in the nation and beyond.

Mission

To provide efficient, affordable and reliable infrastructure for sustainable economic growth and development through modernization, rehabilitation and effective management of all infrastructure facilities in the County

Goal

The overall Goal of the department is to Manage and maintain a standard road network system that serves the interest of the community

Development Priorities

Development Need.	Priority	Strategy.
Impassable roads.	Upgrading of Impassable roads	Opening of access roads.
		Grading of access of roads.
		Gravelling of access roads.
		Tarmacking of access roads.
Inadequate Security.	Rehabilitation of existing and installation of new security lights	Installation of Floodlights.Installation of Street lighting.

Low Electricity Connectivity	Increase connectivity.	Supply & Installation of Transformers.Lowering of connectivity cost.
Poor road Connectivity	Improve Connectivity	Construction & Rehabilitation of footbridges & bridges.
Poor Drainage of roads & urban areas.	Improve drainage	 Excavation of Drains Desilting of drains & Culverts Storm water management in urban areas
Poor Road safety.	Improve of roads safety	 Construction of N.M.T facility. Installation of road bumps. Zebra crossings. Construction of bus parks. Training of road users on road safety i.e. Boda boda operators

Sector Programmes

Programme Name: Ene	Programme Name: Energy Distribution.										
Objective To Ensure access to affordable reliable & sustainable Energy in the county.											
Outcome: Increased us	se of renewable and nonrene	wable Energ	y in the county.								
Sub Programme	Key Outcome	Baseline	Key performance	Planned Targets							
			Indicators	Year 1 Year 2 Year 3	Year 4 Year 5	Total Budget					

Electricity distribution.	Installation of power to all institutions in the County i.e. primary school, E.C.D, Polytechnics, Health Centers etc.	30%	Electricity distribution increased to 60% to improve service delivery	36%	42%	48%	54%	60%	500M
Renewable Energy Development & distribution.	At least 7 Community biogas plants constructed and operational.	0	Clean/alternative Energy available to 600 farmers (100 per sub- County	100	100	150	100		
Energy Regulation.	All development plans approved adhere to Green Energy regulation provision.	2%	Increased Use of renewable Energy by 30 %.	8%	14%	20%	26%	32%

4.3.9. Agriculture, Livestock and Fisheries

Sector composition: Agriculture, Livestock, Veterinary services and Fisheries

Vision: A wealthy and food secure county

Mission: Develop and Exploit Agricultural Resources; Provide Agricultural Extension Services and Adoption of Appropriate Technologies Sustainably.

Sector Goal: Wealth Generation and Food Security

Agriculture Sub Sector

Table 8: Sector Development Needs, Priorities and Strategies

Development needs	Priorities	Strategies
Inadequate and unreliable rainfall for crop and fodder production.	Irrigation infrastructure Capacity building Water harvesting Crops and livestock insurance	 Investin irrigation schemes/infrastructure Train farmers on on-farm water harvesting and efficient utilization technologies. Promote drought tolerant/resistant crops and fodder varieties. Promote crop insurance. -Conserve fodderduring plenty season
Low soil fertility for crop and fodder production	Soil fertility and acidity management	 Promote soil testing and fertility management Initiate farm input subsidy programme (Manure and fertilizer subsidy)

Unreliable marketing systems	Group marketing Contract farming Market infrastructure	 Formation of producer cooperatives Promotion and enforcement of contract farming Upgrading of markets and market infrastructure. Promote market standards and ICT application Enhance commodity value chain development, Sensitize Farmers on business planning
Low quality and high cost of inputs and services	Seed, fertilizers and pesticides Livestock feeds and equipment Veterinary drugs	 Promote bulk input purchases through producer and marketing cooperatives, Initiate input subsidy programmes Link farmers/farmers' organizations to credit providers. Encourage construction of feed manufacturing plant Introduce a legislation on feeds inspectorate to check quality Encourage investment in feed factory Self-regulation and industry based good practice.
Inadequate extension services	High extension staff to farmer ratio.	 Recruit agricultural extension agents to replace those exiting service Promote ICT in extension service delivery. Collaborate with other extension service providers. Ensure adequate facilitation to extension service providers. Revitalization of Kenyatta Agricultural Training Centre to a Centre of excellent for training farmers, staff and other stakeholders
Inadequate pre and postharvest management and value addition investments.	 Low adoption of new technologies Inadequate information Youth involvement 	 Promote and support of value addition initiatives. Promote on-farm and off farm storage and transport facilities Create awareness on pre and post-harvest losses and management. Promote Cottage industries
Land subdivision into non economical units and conversion into real estates	Land use policy	 Develop land use policy in collaboration with national government Support fish farmers with pond liners with who are in sandy

		 soils and red volcanic porous soils. Adopt the new technologies of raised ponds to those fish with limited small pieces of land areas
Crops and livestock disease and pests	Emerging and existing zoonotic diseases of anthrax, rabies and rift valley fever Emerging crop pests and diseases	 Adopt the county one health strategy in control of zoonosis Adopt the national rabies eradication strategy Adopt common approach of providing resources for prevention, early detection and response to zoonotic disease Establishment strategic pest and disease control unit
Lack of record keeping data and information management at farm and county level		 Train farmers on record keeping at farm level. Adopt a mechanism of keeping collected data and information management at the county level
Poor traceability of crop and animal products		 Adopt animal registration, identification and product traceability
Poor quality water and environmental pollution.	Extension support Affordable fish equipment	 Provide inputs support by assisting farmers with pond liners Provide quality, reliable and clean water for fish activities Create environmental awareness on sustainable aquaculture technologies Train fish farmers on environmental conservation and water harvesting techniques.

Table 15: Sub-Sector Programmes

A. Livestock Production Sub Sector

Vision

"To be the leader in facilitation and delivery of efficient and effective services for a sustainable and prosperous livestock

sub-sector".

Mission

"To provide timely support services that increase productivity, value addition and market access for the livestock subsector products".

Sub Sector goals and targets

To transform livestock production into a commercially oriented enterprise that ensures sustainable food security and wealth creation in Murang'a County.

B. Veterinary Services Sub Sector

Vision

To Promote and Facilitate the Achievement of Optimal Animal Health, Welfare, Production and Trade.

Mission

To Provide Efficient Veterinary Services for Production of Safe and High Quality Animal and Animal Products; promote trade and Industrial Growth in a Sustainable Manner.

Subsector Goal

Safeguard Livestock and Human Health, Improve Livestock Productivity and Promote Trade in Animal and Animal Products.

C. Fisheries Development Sub Sector

Vision:

A lead agency regionally in development, management and exploitation of fisheries resources

Mission:

To facilitate sustainable development, management and utilization of fishery resources

Sub-sector Goal:

To ensure increased and sustainable fish production and utilization of fish and fish products by properly managing the county fishery resources.

Table 8: Sub-Sector Programmes and sub-Programmes

4.3.10.Water and Irrigation

The sector comprises of two sub-sectors

- Irrigation, Drainage and Water Storage Sub-sector
- Water and sanitation Sub-sector

A. Irrigation Sub-Sector

Vision

Irrigation, Drainage and Water storage Service provider of choice.

Mission

To provide quality Irrigation, Drainage and Water storage technical services fairly and efficiently.

Goal

To increase the area under irrigation for increased agricultural production and productivity.

Strategic Objectives

- i. To increase utilization of land through irrigation, drainage and water storage
- ii. To mobilize and promote efficient utilization of resources
- iii. To strengthen institutional capacity
- iv. To mainstream governance, HIV/AIDS, and gender in irrigation schemes
- v. To provide Monitoring and Evaluation

B. Water and Sanitation Sub Sector

Vision

Sustainable access to quality water and enhanced sanitation for socio-economic prosperity.

Mission

To ensure sustainable provision of safe water and enhanced sanitation services by developing, rehabilitating quality utilities and for life-long enrichment of our stakeholders.

Strategic Objectives

- i. To increase the proportion of population accessing safe water
- ii. To increase the proportion of urban population accessing improved sewerage
- iii. To increase the strategic water storage

Sub Sector Goals

- i. Ensure availability and sustainable management of water and sanitation for all.
- ii. Ensure access to affordable, reliable, sustainable water

Sub-sector Development needs, Priorities and Strategies

Sub-sector	Development needs	Priorities	Strategies		
Irrigation, Drainage and	Increased access to irrigation water	- Feasibility studies to determine the technical and	- Development of water harvesting and storage infrastructure for irrigation.		
Water Storage	Flood control	socio-economic viability of projects.	 Infield irrigation water management. Rehabilitating and upgrading existing 		
	Building farmers capacity on water use and management	 Project planning and design. Implementation, 	under-utilized irrigation systems. - Enhancing farmer education and		

Establish water users association Enhancing compliance with Environmental, statutory and legal requirement To improve irrigation technology Climate change mitigation	 operationalization and management of irrigation schemes. Mitigating effects of climate change by harnessing agricultural water resources and storage infrastructure to reduce flood and drought disasters, and environmental damage arising from climatic variations. Establishment and Legalization of Irrigation Water Users' Associations (IWUAs) Improving irrigation technology such as the use of solar energy and other renewable energy in pumping. Enhancing Public-Private Partnerships by encouraging private sector players to invest and participate in irrigation. Strengthening stakeholder participation in all irrigation projects and initiatives. Enhancing compliance with environmental, statutory and legal requirements

Cross-Sectoral Implementation Considerations

Table 18: Cross-sectoral impacts

Programme Name	Sector	Cross-sector Impac	t	Measures to Harness or Mitigate the Impact
		Synergies	Adverse impact	
Irrigation Water a	Water and Irrigation	Group registration by Social Services Department.	Time taken by the farmers to comply with the requirements is too long.	Enhanced community sensitization.
		Acquisition of way-leaves by farmers.	Project planning process takes too long due to complexities involved.	 County Government to set a fund specifically for compensation of upstream farmers in order for them to accept to sign the way leave. Legislation on use of riparian land by County Assembly. The Roads Department to mark out the road reserves and WRMA to mark (river pegging) the riparian land. This will deter farmers from claiming compensation in the road reserve and riparian areas.
		Water use authorization by Water Resources Users Association	The WRUA officials are not easily accessible since they mostly don't have fixed offices.	The WRUAs should be housed in places where their services can be easily accessed.

		(WRUA)		
		-Regulation of use of water resources -Allocation of water and water permits by WRMA	The process is lengthy, tedious and the legal document fees and charges are costly.	 Review of fees or charges for legal documents e.g. Hydrological surveys and Water permits. Cost sharing of charges between the community and the County Government.
		Enforcement of environmental laws and regulations by NEMA	The requirement is costly hence delay in project planning.	- Review of fees or charges for legal documents e.g. Environmental Impact Assessment and Environmental Audit.
				- Cost sharing of EIA charges between the community and the County Government.
		Acquisition of easement from Kenya Forestry Service.	The process is lengthy, tedious and costly hence delay in project planning and design.	 County Government to set a fund specifically for compensation. The County Government to gazette forests for damming sites.
		Project funding by the National Government.	The level of funding has been low.	National Government to enhance funding to complement the County Government.
		Capacity building of farmers	Level of involvement has been low.	 Resource mobilization and cost-sharing of training requirements. Enhanced co-ordination. Strengthen linkages.
Water Resources Management	Health	water borne disease control	Increased water borne disease breakouts	-County government to reserve funds for compensation and drugs
	Environment	conserve water catchment area	-Unnecessary regulatory charges	Tree planting
			-Demand for compensation on lee ways.	Harmonize regulatory charges to a single fee

4.4. Flagship /County Transformative Projects

These are projects with high impact in terms of employment creation, increasing county competitiveness, and revenue generation.

Project Name	Location	Objective	Output /Outcome	Performance indicators	Timeframe (Start-End)	Implementing Agencies	Cost (Ksh.)
Dairy Development Program	Countywide	To improve livelihoods of the dairy farmers.	Increased earnings by dairy farmers	-No of litres of milk sold -Amount of money paid to dairy farmers	On-going	MCG	
Kenneth Matiba Eye and Dental Hospital	Kenol Town	To provide quality and affordable eye and dental healthcare services	Improved eye and dental health	-No. of dental clients served -No. of eye clients served	On-going	MCG	
'Nipe Macho Nione' program	Countywide	To enhance eye sight to the visually impaired persons	Improved eye sight	No of clients supported with eye glasses	Continuous	MCG	
Murang'a Referral Hospital Renal Unit	Murang'a Town	To provide affordable renal services to patients	Improved renal healthcare	No. of clients undergoing dialysis per day	Continuous	MCG	
Low-cost Public Primary Boarding Schools	Countywide	 To improve academic performance in the County To provide a home for 	No of low cost boarding primary schools	No of boarding pupils in the low cost primary schools	On-going	MCG	

		the less fortunate pupils		-No of low cost schools operating			
Street lighting Project	Countywide	To enhance a conducive environment to conduct business for long hours	-Enhanced security -Prolonged period of conducting business	- No. of towns / markets with street lights	On-going	MCG	
ECDE School Feeding Program	Countywide	-To increase enrolment rate -Increase retention rate -Improve to transition rate	-Improved health -Increased literacy levels	 -% increment in enrollment -% increment in retention -% increment in transition 	Continuous	MCG	
School Milk Program	Countywide	-To increase enrolment rate -Increase retention rate -Improve to transition rate	-Improved health -Increased literacy levels -Increased earnings for dairy farmers	 -% increment in enrollment -% increment in retention -% increment in transition -% increment in earning by dairy farmers 	Continuous	MCG	
Ajibika & Githuri/Kimathi Irrigation Projects	Kandara and Kiharu SubCountie	Increased food production through irrigated agriculture	-Increased food production	-No. of acres under irrigation	On-going	MCG	

	S		-Increased acreage under irrigation	-No. of households practicing irrigated agriculture			
New Irrigation Projects	Countywide	To promote irrigated agriculture	To economically empower farmers through irrigated agriculture	-No. of household connected -No. of hectares under irrigation	2018-2022	MCG	
Foot Bridges	Countywide	To enhance connectivity and access across the County	-Improved connectivity and accessibility countywide	-No. of footbridges constructed	On-going	MCG	
Market Sheds		Provide a conducive environment for conducting business	-Increased earning by traders -Enhance hygienic standards in market centers	-No. of market sheds constructed	On-going	MCG	
Modern Stalls/Kiosks	Countywide	Provide a conducive environment for conducting business	 -Increased earning by traders -Enhanced security for businesses -Well organized market/town hence enhanced town aesthetics 	-No. of modern stalls/kiosks constructed	On-going	MCG	

Fruit Trees Development Program	Countywide	To increase productivity and earning in fruits value chain	-Increased earnings by fruit trees farmers	-Increased price per fruit	On-going	MCG
Kaa Sober Rehabilitation program	Countywide	To rehabilitate drug and alcohol addicts	Reformed drug and alcohol addicts	No. of drug and alcohol addicts rehabilitated	Continuous	MCG
Beyond Zero Program	Countywide	To provide Maternal & Child Health, Screening of communicable & non- communicable diseases, and treatment of minor illnesses	Improved Health	-No. of clients served	Continuous	MCG
Kirwara Level 4 Hospital	Kirwara Market	To provide accessible healthcare services	-Improved access to healthcare services	-Functional Level 4 hospital	On-going	MCG
Coffee Development Program	Coffee Growing Zones	To enhance quality and quantity of coffee and increase earnings by coffee farmers	 -Increased earnings by coffee farmers -High quality and quantity of coffee produced 	-No. of Tonns produced -% increment in earnings	On-going	MCG

CHAPTER 5: IMPLEMENTATION FRAMEWORK

5. Introduction

This chapter discusses the implementation framework which include institutional framework responsible for the implementation and actualization of the plan, resource mobilization, resource gaps and measures to address the gaps.

5.1. Institutional framework

The institutional framework for implementation of County Government functions is anchored on organisational set up as stipulated in the County Governments Act, 2012. The organogram has two distinct institutions namely; the Executive headed by H.E. the Governor and deputised by H.E. the Deputy Governor; the County Executive Committee Members who heads various Sectors of the County Government and the Legislature comprising the County Assembly Speaker, Deputy Speaker, and the County Assembly Service Board. Each of this tier has organisational structures that supports their operations. This framework provides a link with the National Government for the purpose of implementing this plan. The two levels of government harmoniously work together for successful implementation of the plan.

5.1.1. County Executive

Governor

The Governor is the chief executive of the county and will provide overall leadership in the county's economic, social and political governance and development; provide leadership to the county executive committee and administration based on the county policies and plans; promote democracy, good governance, unity and cohesion; promote peace and order; promote the competitiveness of the county; is accountable for the management and use of the county resources while promoting and facilitating citizen participation in the development of policies and plans, and delivery of services.

Deputy Governor

The Deputy Governor is the deputy chief executive of the county and shall deputize the governor in the execution of the executive functions. The deputy Governor may be assigned any other responsibility by the Governor as a member of the county executive committee.

County Secretary

The County Secretary is the head of the county public service; responsible for arranging the business, and keeping the minutes of the county executive committee subject to the directions of the executive committee; convey the decisions of the county executive committee to the appropriate persons or authorities and perform any other functions as directed by the county executive committee..

County Executive Committee Members

The County Executive Committee is comprised of 10 executive members appointed by the Governor and approved by the County Assembly. Each County Executive Committee member is responsible for the respective departments. The Executive Committee is responsible for supervising the administration and delivery of services in all decentralized units and agencies in the county. The committee will also perform any other functions conferred on it by the constitution or national legislation; carry out any function incidental to any of the assigned functions.

The County Executive Committee Members (CECM) consisting of: -

- i. Public Service and Administration
- ii. Finance, IT, and Economic Planning
- iii. Education, Youth, Sports, Culture, and Social Services
- iv. Health

- v. Trade, Tourism, Investment, Agri-Business, & Cooperatives
- vi. Environment and Climate Change
- vii. Lands, Housing, and Urban Development
- viii. Roads, Transport, Energy, and Public Works
- ix. Agriculture, Livestock, and Fisheries
- x. Water and Irrigation

County Chief Officers

The Chief Officer will be the Accounting and Authorized Officer for the Department assigned in accordance with section 45(4) of the County Governments Act 2012, and will be responsible to the respective County Executive Member for the following: General administration and coordination of respective County Department; Initiation, development and implementation of policies and sector plans; Development and implementation of strategic plans; Promotion of National values and principles of governance in the County Public Service; Overseeing implementation and monitoring of performance management systems and any other duties as may be assigned by the Executive Committee Member or the County Secretary.

Directors

The County Directors are heads of their respective departments. They guide policy formulation and implementation as contained in the CIDP and other development documents. They deputize the Chief Officers in executing their functions in the county departments.

County Public Service Board

The functions of the County Public Service Board on behalf of the County government are:

Establish and abolish offices in the County public service; Appoint persons to hold or act in offices of the County public service including in the Boards of cities and urban areas within the County and to confirm appointments; Exercise disciplinary control over,

and remove, persons holding or acting in those offices as provided for under this Part; Prepare regular reports for submission to the County Assembly on the execution of the functions of the Board; Promote the values and principles referred to in Articles 10 and 232; evaluate and report to the County assembly on the extent to which the values and principles referred to in Articles 10 and 232 are complied with in the County public service; Facilitate the development of coherent Integrated human resource planning and budgeting for personnel emoluments in counties; Advise the County government on human resource management and development; Advise County government on implementation and monitoring of the national performance management system in counties; and make recommendations to the Salaries and Remuneration Commission (SRC), on behalf of the County government, on the remuneration, pensions and gratuities for County public service employees.

The County Budget and Economic Forum

The County Budget and Economic Forum (CBEF) is set-up to coordinate and collect views from the public during the budgeting process and function as a think-tank for the County government in terms of financial and economic management. The CBEF assists the county to analyses and identify its priorities as they budget for programs, improve coordination between the citizens and government and improve harmonization of project implementation and funding. The County Budget and Economic Forum consist of the following members:-The Governor who shall be the chairperson and other members of the County Executive Committee. A number of representatives equal to the number of executive committee members appointed by the Governor. These persons should be nominated by (and represent) organizations representing professionals, business, labour issues, women, persons with disabilities, the elderly and faith based groups at the county level. The persons should not be drawn from county public officers.

5.1.2. County Assembly

The County Assembly is the legislative arm of the County government. It is composed of the Members of County Assembly (MCAs) both elected and nominated, the Speaker and the Clerk as an ex Official. The function of the County Assembly includes: Vetting and approving nominees for appointment to County public offices; Approving the budget and expenditure of the County government in accordance with Article 207 of the Constitution, and the legislation contemplated in Article 220 (2) of the Constitution, guided by Articles 201 and 203 of the Constitution; Approve the borrowing by the County government in accordance with Article 212 of the Constitution; Approve the borrowing by the County government in accordance with Article 212 of the Constitution; Approve County development planning; and Perform any other role as may be set out under the Constitution or legislation.

5.1.3. County Assembly Service Board

The board is responsible for providing services and facilities to ensure the efficient and effective functioning of the county assembly; constituting offices in the county assembly service and appointing and supervising office holders; preparing annual estimates of expenditure of the county assembly service and submitting them to the county assembly for approval, and exercising budgetary control over the service; undertaking, singly or jointly with other relevant organizations, programmes to promote the ideals of county democracy; and performing other functions necessary for the well-being of the members and staff of the county assembly; or prescribed by national legislation.

5.1.4. National Government

The County government in collaboration with the national government will work to synergise efforts to achieve its vision and implement development priorities. Key institutions are as provided by the National Government Coordination Act, 2013.

County Commissioner

The County Commissioner, Deputy County Commissioners, Assistant County Commissioners, Chiefs and the Assistant Chiefs will be important in the implementation of the CIDP. These are officers appointed and deployed by the national government and are responsible for the public administration in the County. The County Commissioner is the chair of County Security and Intelligence Committee whose responsibility will be to ensure that security prevails. Security is vital for development initiatives especially given that the CIDP has adopted the Public Private Partnerships whose sustainability is sensitive to security. He/she is also a member of County Community Policing Authority in which the Governor chairs and where recommendations on proper security measures will be done. The County Commissioner also co-chairs the County Development Committee (CDC) which constitutes all development actors in the County and whose main mandate will be to guide County development in all sectors.

The County Directors

This constitutes of directors those whose roles have been devolved and those performing functions of the National government. They are civil servants, appointed by the Public Service Commission and the County Public Service Board. The County Directors are heads of their respective departments. They guide policy formulation and implementation as contained in the CIDP and other development documents.

5.1.5. Stakeholders

Various stakeholders work together with the county and include: World Bank, Council of churches, UKAid, USAid, AHADI, FREED, DANIDA, KENFIBA, PCPM, CDC, HIGDA, VIHDA, CHS, APHIA, AHF, PSK, Global Fund... among others.

5.2. Resource Requirements by Sector

Table 19: Summary of Proposed Budget by Sector

Sector Name	Amount (Billion Kshs)	As a percentage (%) of the total budget
Public admin and human resource	35.032	44.05
Finance, IT, and economic planning	0.965	1.21
Education, Youth, Sports, Culture, and Social Services	3.435	4.32
Health	10.614	13.35
Trade, Tourism, Investment, Agri-business, and Cooperatives	2.392	3.01
Environment, water and natural resources	1.916	2.41
Land, housing and urban development	4.885	6.14
Roads, Transport, Energy, and Public Works	4.65	5.85
Agriculture, Livestock, and Fisheries	10.758	13.53
Water and Irrigation *****	4.873	6.13
Total	79.52	100.00

***** - This figure is exclusive of proposed 5 mega dams in the County at a cost of Kshs. 100 Billion expected to be sourced from donors, well-wishers and other agencies.

5.3. The Resource Mobilization Framework

This section should explain the resource mobilization strategies which should include: revenue raising, asset management,

financial management, debt management, capital financing and accountability. The section should also detail resources expected from own-source, the equitable share of national revenue, expected conditional grants from National Government or Development Partners as well as the Public-Private Partnerships (PPPs) arrangement.

Table 20: Revenue Projections

Type of Revenue	2018	2019	2020	2021	2022	Total
a)Local revenue by category

5.4. Estimated Resource Gap and Measures of Addressing It

The section has captured the resource gap and measures on how to address the resource gap. During the Financial years 2013/2014 to 2016/2017, the county total revenue was KShs. 2,106,600,598 against a target of KShs. 4,126,780,081 hence a shortfall of KShs. 2,020,179,483 representing 50% of the target. The County has however depended mainly on the equitable share from the National Government to finance her operations since local revenue collection has not been optimised.

Measures to mobilize resources include;

- (I) Formulate a resource mobilisation strategy
- (II) Promote Public Private Partnerships and collaboration with development partners.
- (III) Map out all potential county revenue streams.
- (IV) Automate of revenue management System
- (V) Review of County Finance bill.
- (VI) Review the Valuation Roll to ensure the rates used to collect revenue reflect the current fair value of the property.
- (VII) Develop a Tariffs and Pricing Policy and provide the rationale for levying fees and charges, as well as a basis for setting fee/charge levels.
- (VIII) Ensure that taxes, fees and charges comply with all prevailing legislation and that there is consistency on how tariffs are applied throughout the County.
- (IX) Ensure efficient credit control and debt collection systems to ensure full recovery of fees and charges.

(X) Improve efficiency and effectiveness of the department, review workload and competency needs and support staff to fill skills gap through training.

CHAPTER SIX: MONITORING AND EVALUATION FRAMEWORK

6. Introductions

This chapter gives a brief description of the Monitoring and Evaluation framework in the County. It outlines the M&E methodology and reporting as well as dissemination and citizen engagement mechanisms.

The County monitoring and evaluation of performance seeks to achieve the following four objectives:

- a) To facilitate Informed Decision-making: This will provide valuable insights into how the programmes are being implemented, the extent to which it is serving the intended beneficiaries, its strengths and weaknesses, its cost effectiveness and potentially productive directions for the future.
- **b)** Effect Impact Assessment: This will entail measuring and judging the impact of the programmes in relation to the planned outcomes.
- **c)** Accountability: Programmes' planning accountability will entail an effort to meet the diverse information interests and expectations of all those who have a stake in the Sector the citizens.
- d) Learning Process: This will seek to maximize on citizens' participation. This evaluation will be a human centred assessment of the extent of citizens' participation, how well participation is doing and what is effect of the programme on the citizens. This is guided by the notion that to live is to learn, and to neglect lessons from life experience is to waste the life itself.

6.1. Data collection, Analysis, and Reporting

The methodology of data collection and analysis is guided by programmes and sub-programmes. The annual work plans are the basis for outlining the milestones and deliverables as well as their respective due dates. The standardized M&E templates form the basic tool for tracking the implementation of projects and programmes.

6.2. M&E Outcome Indicators

This section summarizes the M&E outcome indicators and targets by sector. Table 16 will be used as the template for the CIDP Results Matrix.

Table 21: Summary of M&E Outcome	e indicators
----------------------------------	--------------

Sector	Sub- Programme	Outcome indicators	Baseline	Source of Data	Reporting Responsibili ty	Situation in 2018	Mid-term Target (2020)	End-term Target (2022)
Public admin and human resource	Administration Services	Effective and responsive management and administration system Conducive work environment with adequate tools and	-	Annual Reports Surveys Circulars	Chief Officers		1 system developed	1 system developed
